

Project Title: **Fall 2025 Online Evaluations (B)**

Survey Audience: **78**

Responses Received: **27**

Response Ratio: **34.62%**

Survey Summary:

The global means for graduate student courses are:

Overall, how would you rate this course?

Graduate: 4.43

Overall, how would you rate the instructor?

Graduate: 4.65

Evaluate Questions as follows: Mark the option you feel most appropriately describes the course / instructor

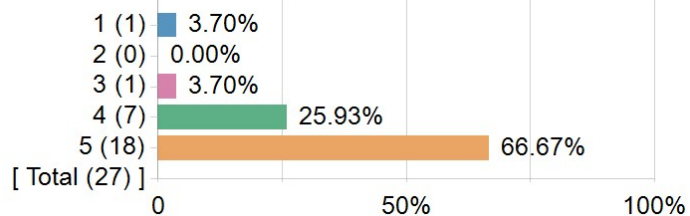

- **N/A - Question not applicable or don't know**
- **1 - One of the least effective, very low**
- **5 - Outstanding, one of the few, extremely high**

Comments to the instructor of this course

Comments
I found the slides hard to follow and it took a long time into the semester to understand the notation and to piece together the way diff topics and ideas fit together. Upon review it was more clear, but it was hard to scope. Dan knows what he's doing and is very nice and cares about teaching a lot, we can all feel it and appreciate him for it. I'm not sure how well I internalized any of the subject, but I also appreciate all the additional reference material he provides (and is willing to additionally provide).
Great lectures. The instructor was very helpful and approachable throughout the course.
Good course, although I did nearly all the things in my undergrad before, this course is a perfect review of the useful knowledge. The teacher is dedicated, and enough proof in the slides, combined with practical practices. I'm surprised how the teacher can stuff this useful content into only 10 weeks. The reason why I gave a 4 in "To what extent did the course increase your understanding of the subject?" is simply because I learned the majority of the content before.
He is nice and helpful. He is very devoted to help students understand the concepts and are always there to help. His slides are very detailed and comprehensive and he always go through the math to help students understand during lectures.he is overall a very good instructor.
I struggled to figure out the best way to prepare for the midterms and finals. It seemed like reviewing slides/homeworks/past midterms/finals was not enough. I would have appreciated more practice in the types of problems I could expect to see on a midterm or final.
Best in this quarter
Loved attending Dan's Lectures. He has a very impressive communication style which makes the material easier to digest
