

Student Evaluation of Teaching (SET) for Dan Yavorsky

Winter 2026 MGT 100 - Customer Analytics (Yavorsky, Daniel Ryan)
Section 998925 [A00]

Enrollment: 103

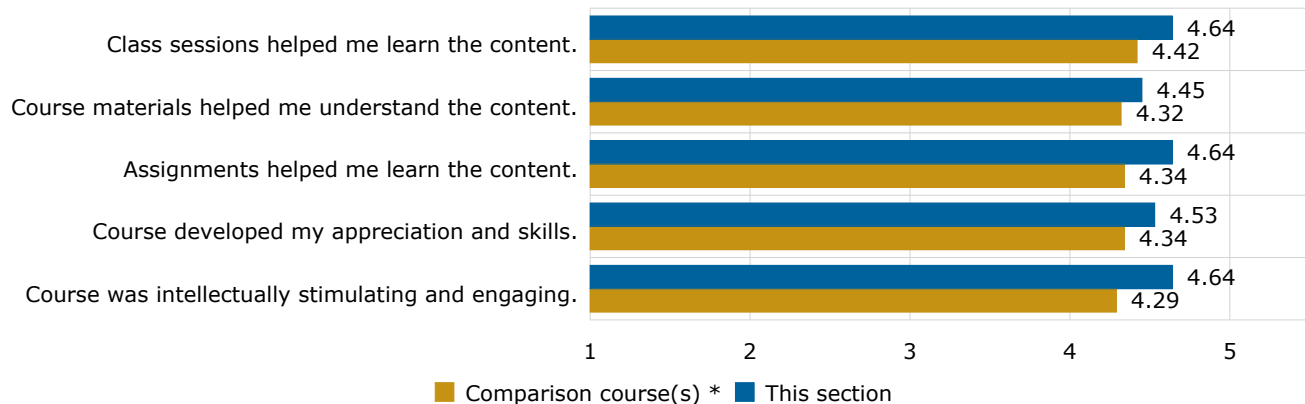

Responses: 90 (87.38% response rate)

SUMMARY RESULTS

* Comparison courses used: All Rady School of Management Winter 2026 UD courses

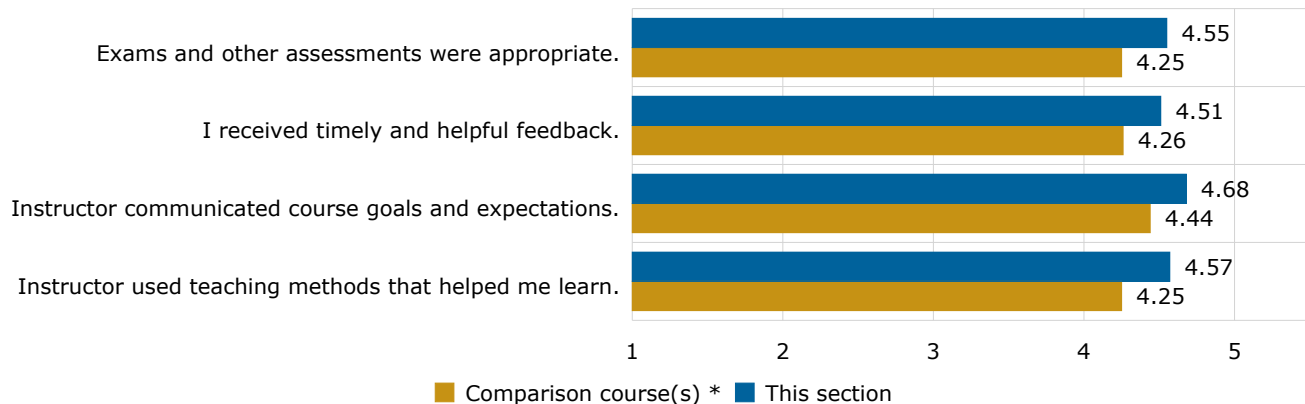

Student Learning

Class Mean: 4.58 (Strongly Agree) **Comparison Mean:** 4.34 (Agree)

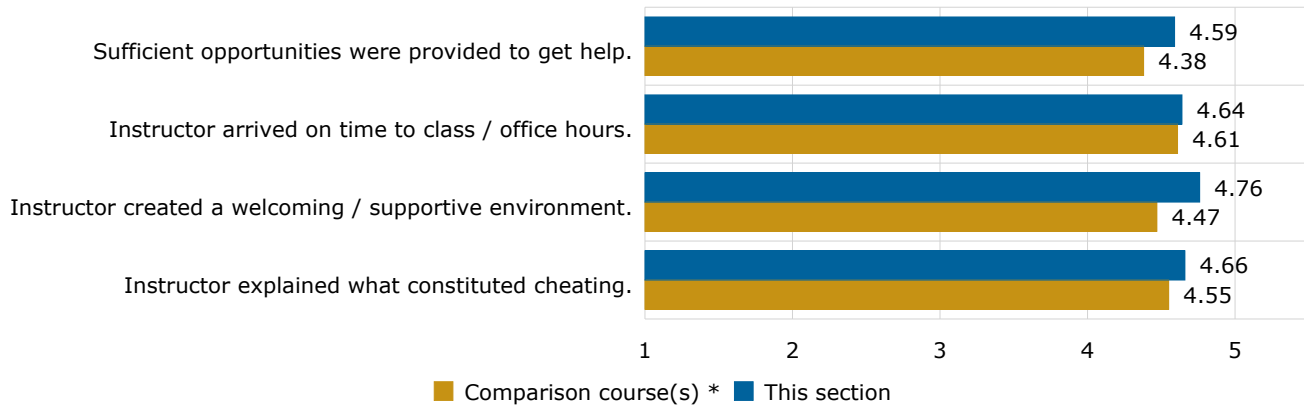

Course Structure

Class Mean: 4.58 (Strongly Agree) **Comparison Mean:** 4.3 (Agree)

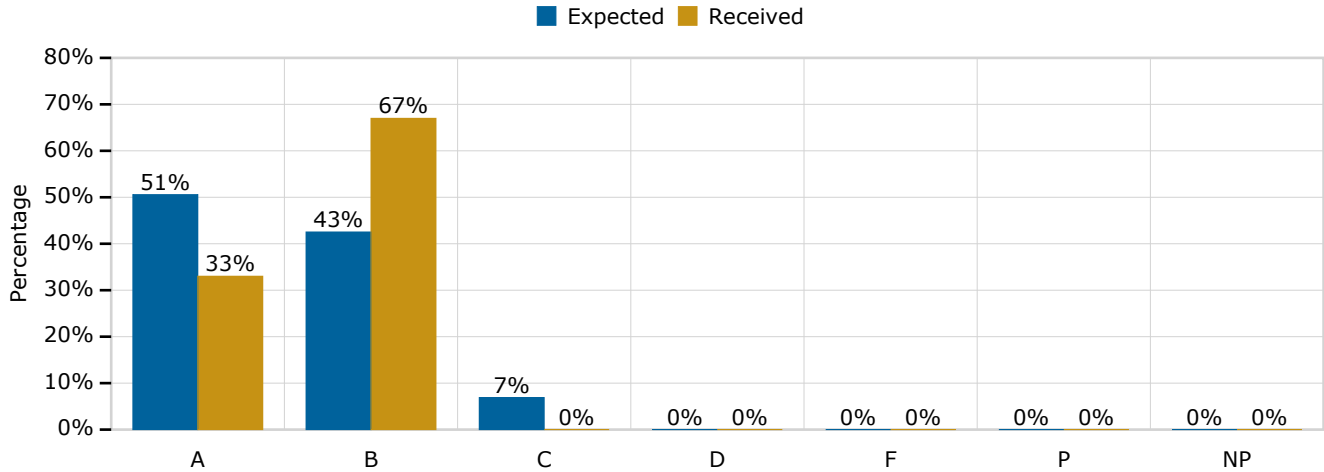

Class Environment

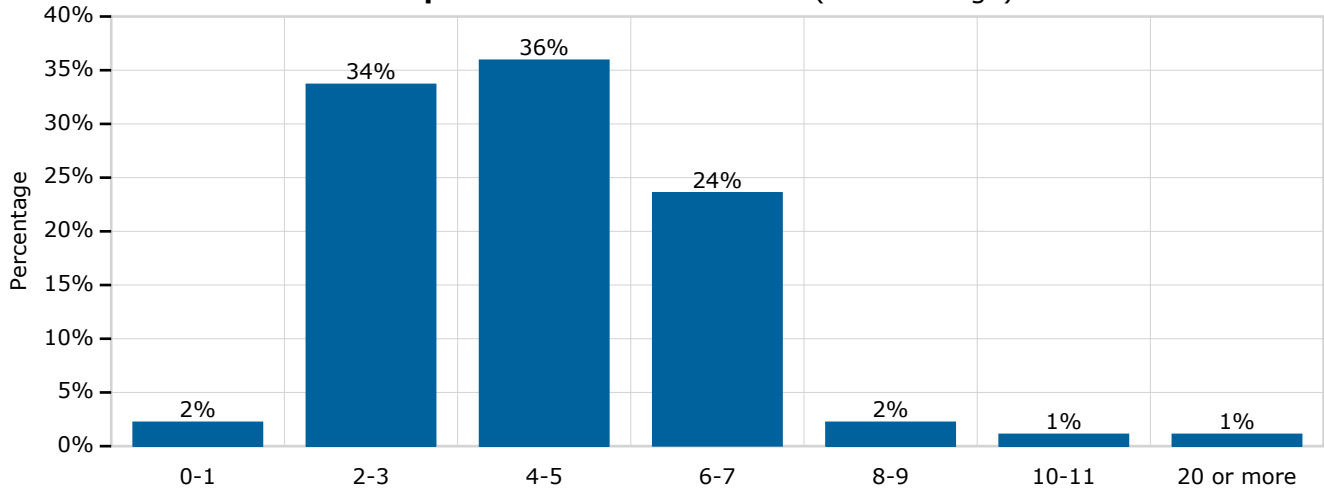

Class Mean: 4.66 (Strongly Agree) Comparison Mean: 4.5 (Strongly Agree)

Expected Grade (B+ average, 3.44, SET respondents) vs. Grade Received (B+ average, 3.33, all students)

Hours per week outside of class (5.03 average)

DETAILED RESULTS

Note: "% Positive" reflects responses of Strongly Agree or Agree; "% Negative" reflects Strongly Disagree or Disagree responses.

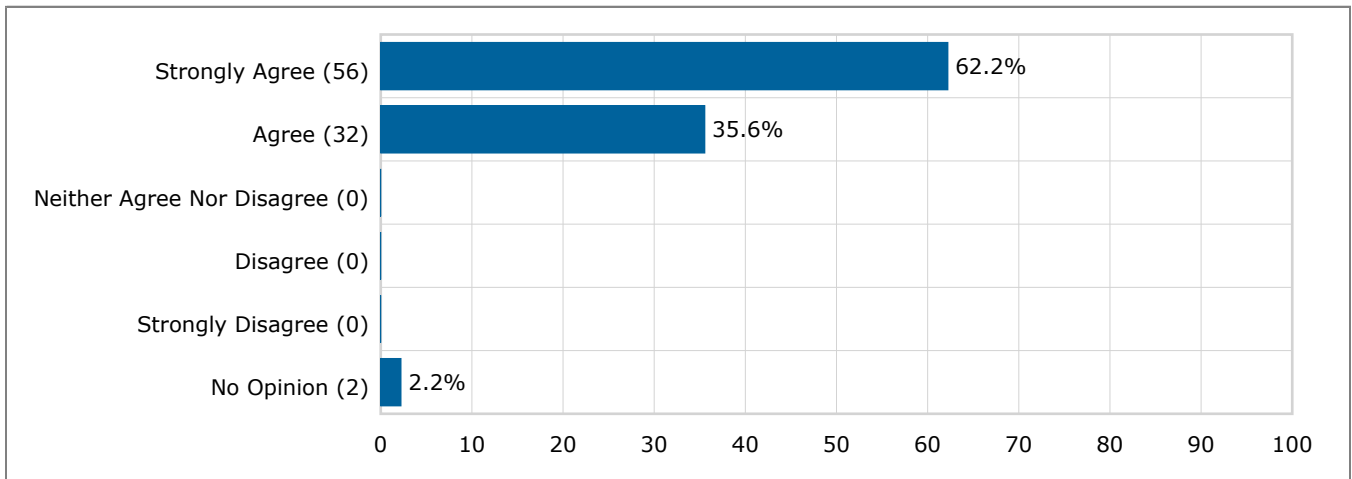

Scoring Methodology

A numerical value is assigned to each response in the standard Likert Scale used for evaluations: Strongly Agree (5), Agree (4), Neither Agree Nor Disagree (3), Disagree (2), Strongly Disagree (1). Responses marked "No Opinion/Not Applicable" are excluded from mean calculations.

Student Learning

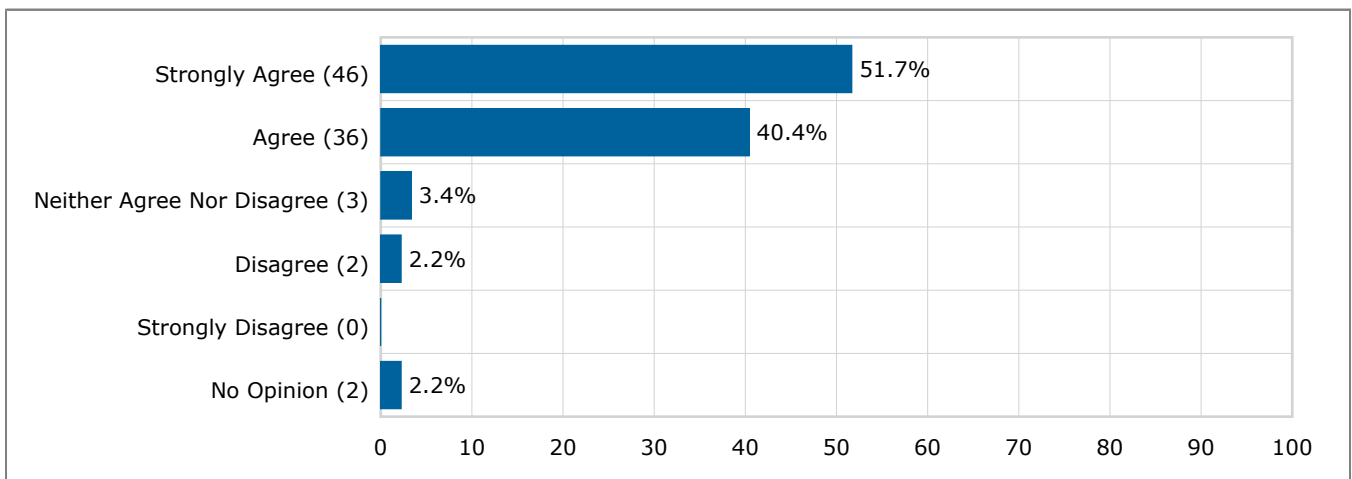

1. Class sessions helped me learn the course content.

% Positive/Negative	Mean (SD)	Median	Response Count
97.8% Positive	4.64 ± 0.48 (Strongly Agree)	5 (Strongly Agree)	90 (100.00%)

2. Course readings and other course materials helped me learn course content.

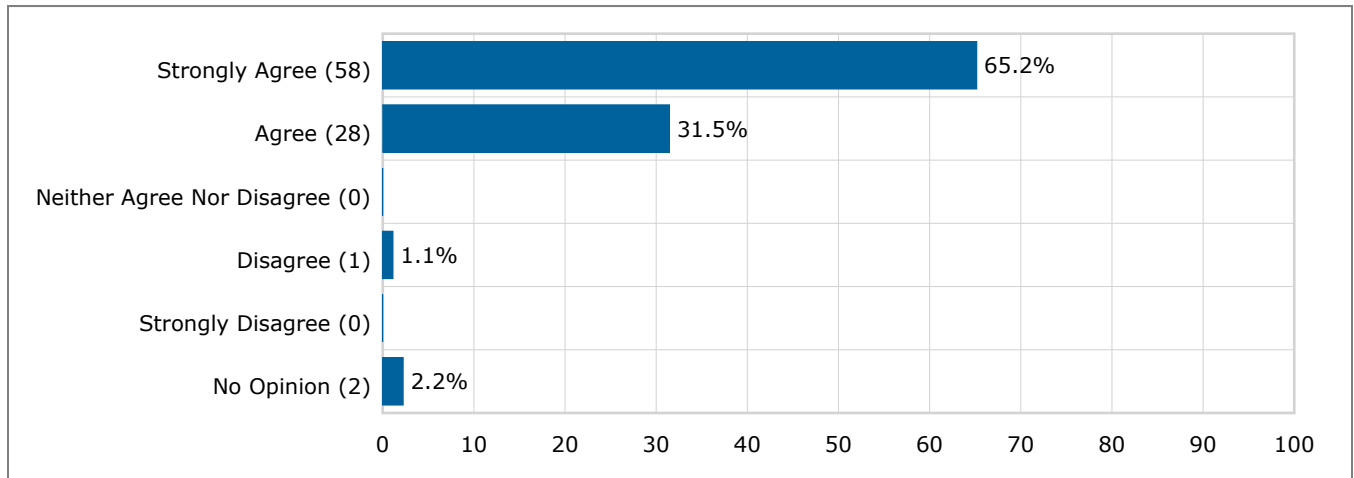

% Positive/Negative	Mean (SD)	Median	Response Count
92.1% Positive 2.2% Negative	4.45 ± 0.67 (Agree)	5 (Strongly Agree)	89 (98.89%)

No Response: 1

3. Assignments (homework, projects, etc) helped me learn the course content.

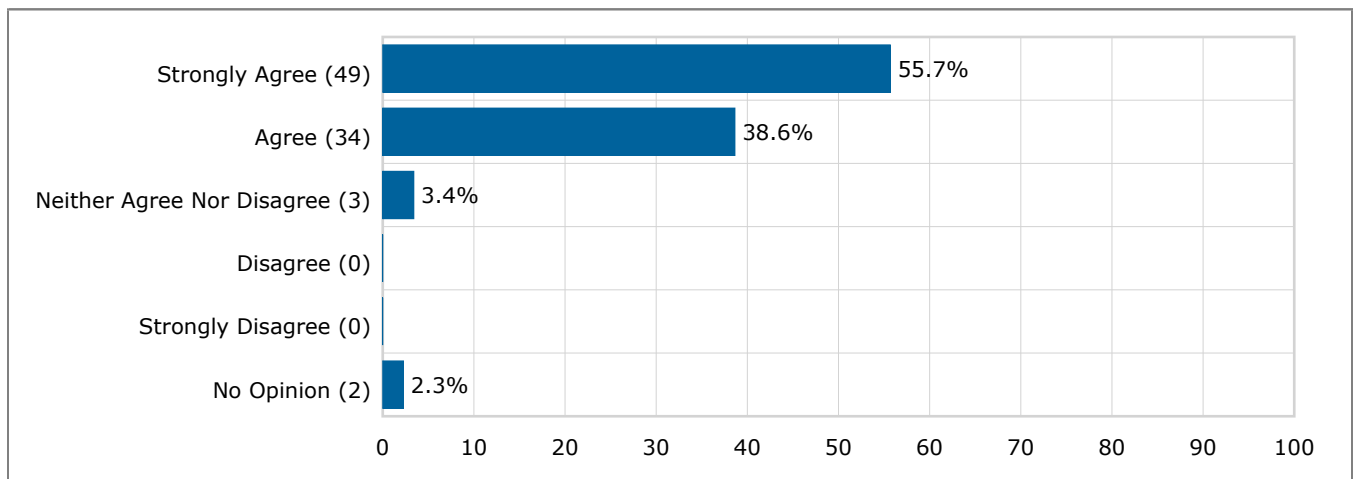

% Positive/Negative	Mean (SD)	Median	Response Count
96.6% Positive 1.1% Negative	4.64 ± 0.55 (Strongly Agree)	5 (Strongly Agree)	89 (98.89%)

No Response: 1

4. The course developed my appreciation of and skills for the subject.

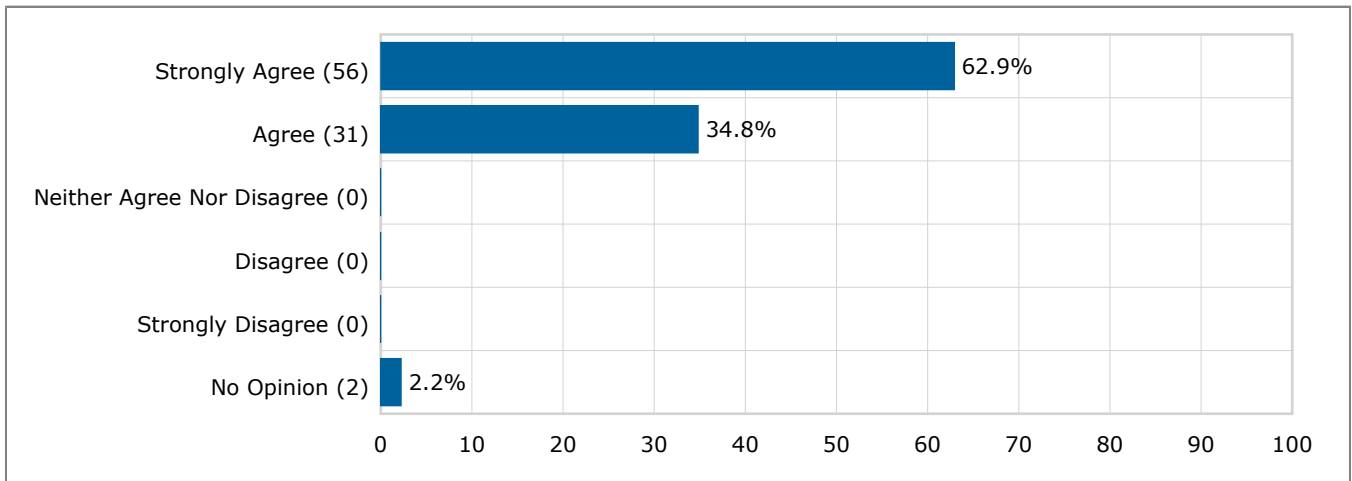

% Positive/Negative	Mean (SD)	Median	Response Count
94.3% Positive	4.53 ± 0.56 (Strongly Agree)	5 (Strongly Agree)	88 (97.78%)

No Response: 2

5. The course was **intellectually stimulating and engaging**.

% Positive/Negative	Mean (SD)	Median	Response Count
97.8% Positive	4.64 ± 0.48 (Strongly Agree)	5 (Strongly Agree)	89 (98.89%)

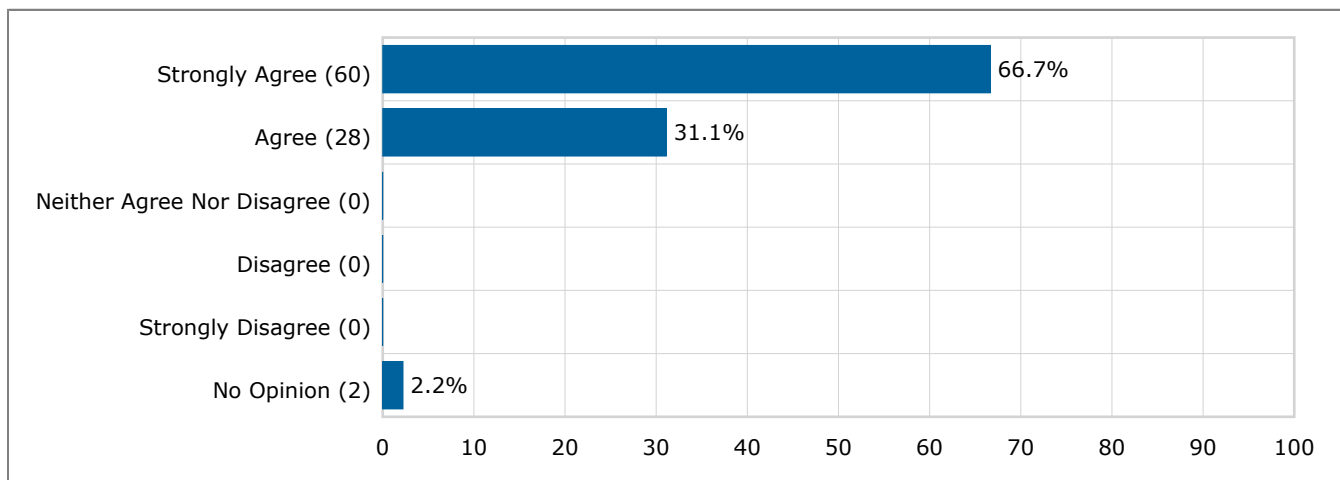

No Response: 1

Course Structure

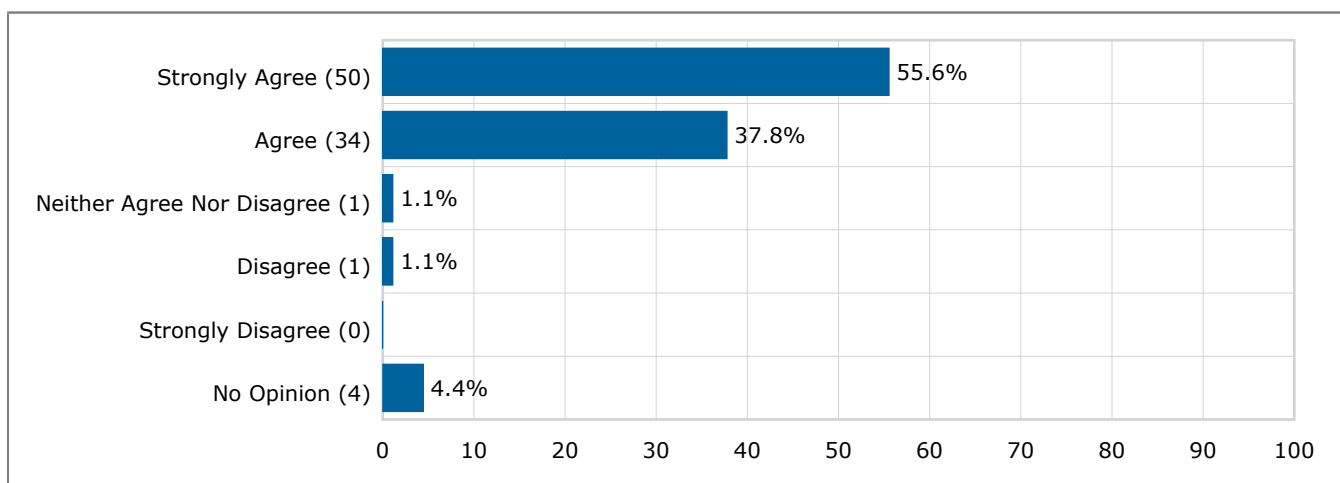

6. The instructor effectively communicated **course goals**, learning **outcomes**, and **expectations**.

% Positive/Negative	Mean (SD)	Median	Response Count
97.8% Positive	4.68 ± 0.47 (Strongly Agree)	5 (Strongly Agree)	90 (100.00%)

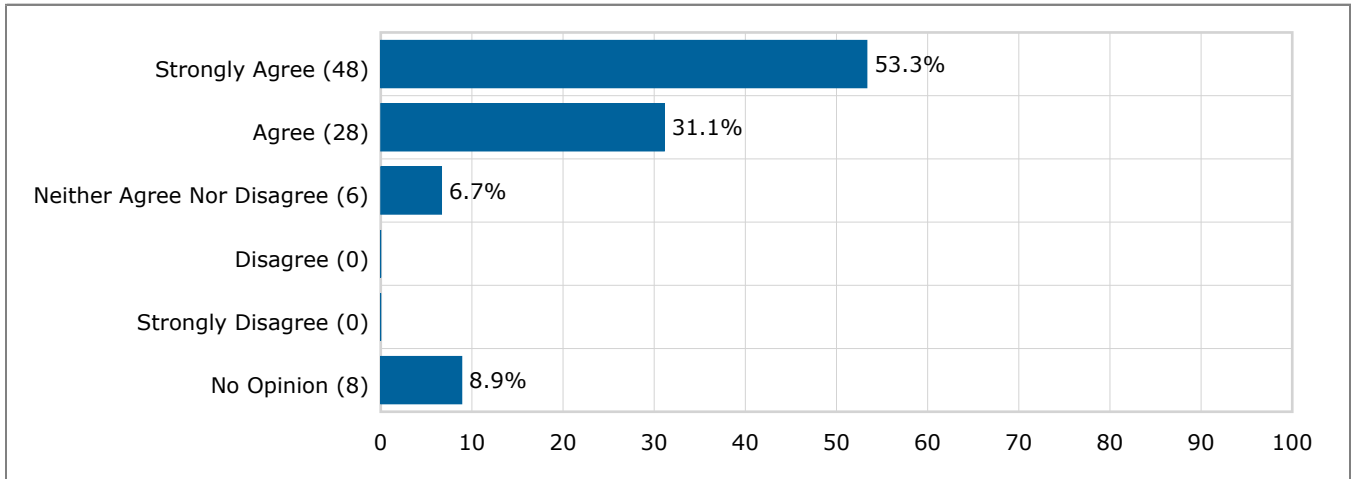

7. **Exams and other assessments** (essays, projects, etc) were an appropriate measure of course learning outcomes.

% Positive/Negative	Mean (SD)	Median	Response Count
93.3% Positive 1.1% Negative	4.55 ± 0.58 (Strongly Agree)	5 (Strongly Agree)	90 (100.00%)

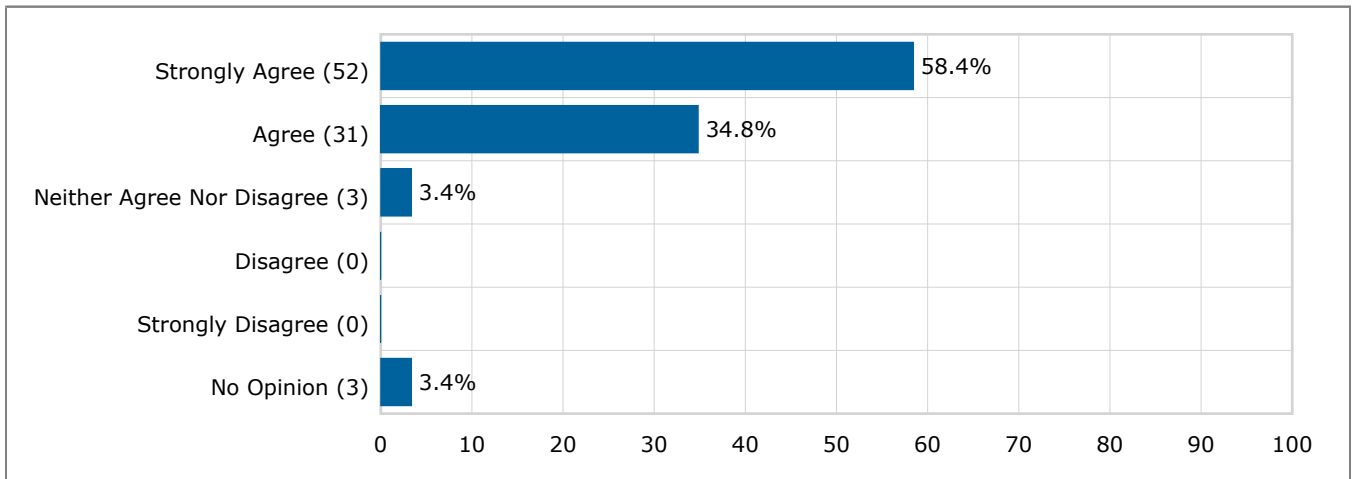

8. I received **timely and helpful feedback** in this course.

% Positive/Negative	Mean (SD)	Median	Response Count
84.4% Positive	4.51 ± 0.63 (Strongly Agree)	5 (Strongly Agree)	90 (100.00%)

9. The instructor incorporated **teaching methods** that helped me learn.

% Positive/Negative	Mean (SD)	Median	Response Count
93.3% Positive	4.57 ± 0.56 (Strongly Agree)	5 (Strongly Agree)	89 (98.89%)

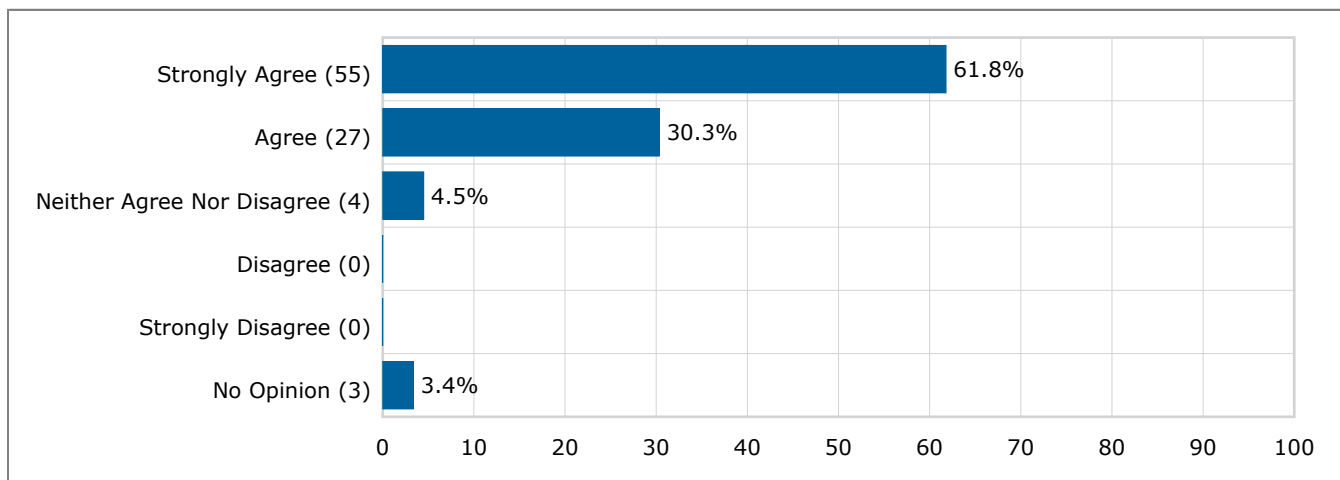

No Response: 1

Class Environment

10. There were sufficient **opportunities offered for me to get help** when needed (e.g. established office hours, discussion section, discussion board, etc).

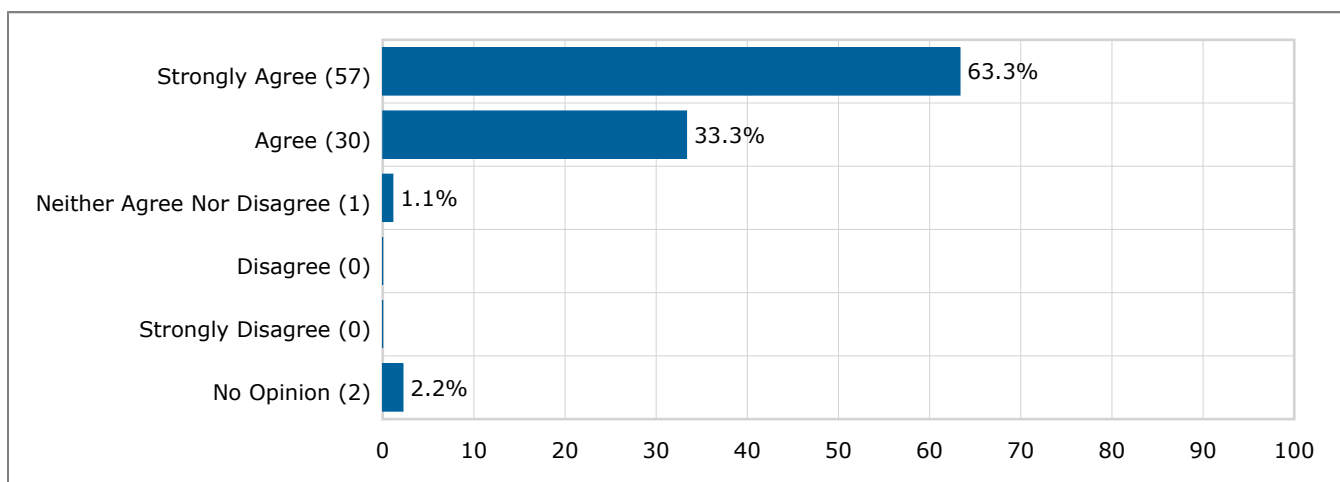

% Positive/Negative	Mean (SD)	Median	Response Count
92.1% Positive	4.59 ± 0.58 (Strongly Agree)	5 (Strongly Agree)	89 (98.89%)

No Response: 1

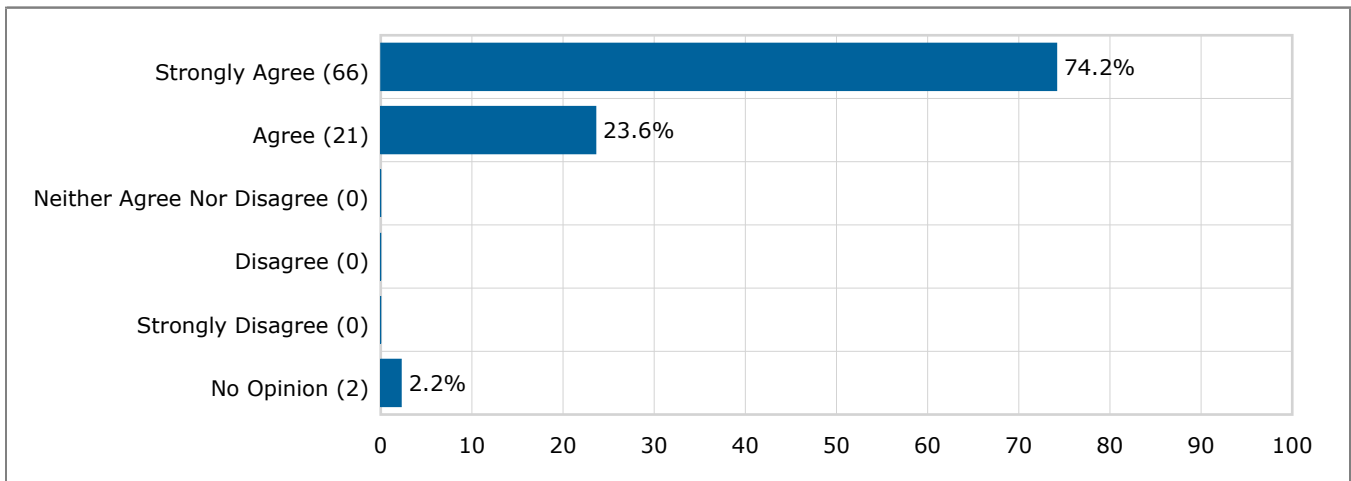

11. The instructor **arrived on time** to class sessions and office hours.

% Positive/Negative	Mean (SD)	Median	Response Count
96.7% Positive	4.64 ± 0.50 (Strongly Agree)	5 (Strongly Agree)	90 (100.00%)

12. The instructor created a **welcoming and supportive learning environment** that valued and supported students from all backgrounds and identities.

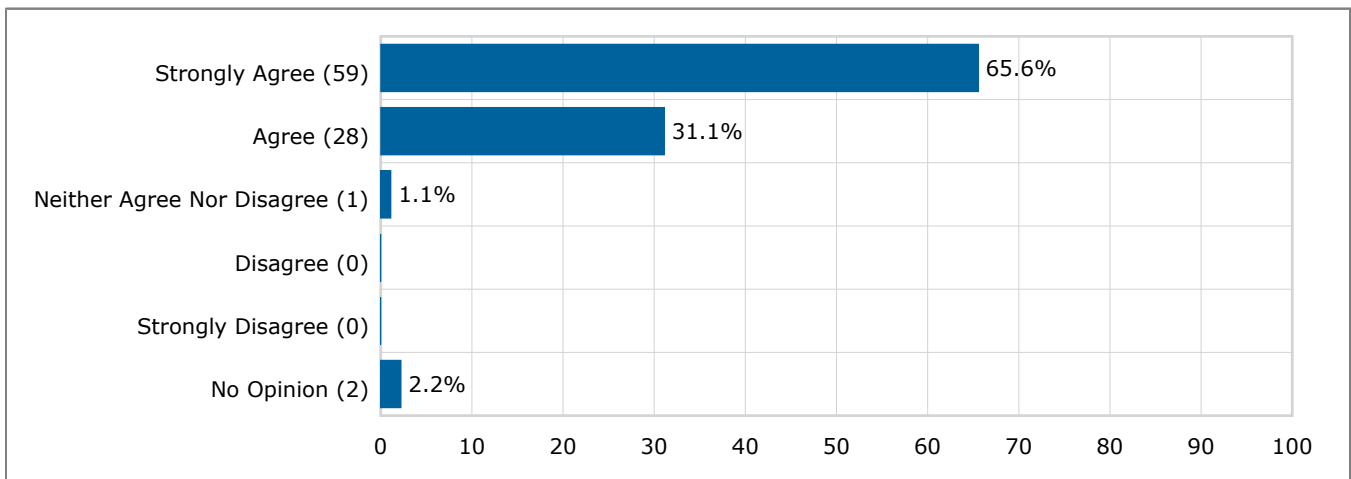

% Positive/Negative	Mean (SD)	Median	Response Count
97.8% Positive	4.76 ± 0.43 (Strongly Agree)	5 (Strongly Agree)	89 (98.89%)

No Response: 1

13. The instructor explained what constituted cheating in this course and emphasized the importance of **academic integrity**.

% Positive/Negative	Mean (SD)	Median	Response Count
96.7% Positive	4.66 ± 0.50 (Strongly Agree)	5 (Strongly Agree)	90 (100.00%)

Please describe any specific aspects of the course and/or teaching practices that your instructor used that...

14. Please describe any specific aspects of the course and/or teaching practices that your instructor used that particularly helped you to engage with the material, learn the material, and/or develop your own critical perspectives on the material.

.....

All the class materials had a clear logic and were related to real life.

All the lectures were really interested and the real life examples that we did really helped to connect the topic we were learning to create a better understanding of the subject.

All the slide and lecture

Analogies and pop culture referances.

good

Good assignments.

Great presentation, easy to approach and used scenarios that happened in today's world.

Great usage of scripts in R and slides. I like how they were separated as two pieces of the day so that we could have a nice little mental break before getting into a new flow of R code

Half the class would go through slides and engaged in discussion with class, then next half was technical stuff with R code and it was perfect.

His slides were more helpful than the readings. The readings confused me if they had math. I liked it better when he wrote math on the board instead of just showing us the formulas used for the class. Going over the r-script together was also helpful. The videos that he provided were useful too.

His teaching style is really engaging

Honestly, even though I found the weekly quizzes annoying to consistently do every week, it helped reinforce the previous week's code and the current week's readings.

I like how Prof. Dan used examples from students/current examples to make his lectures more relatable to students. I also like how he constructed "consulting-like" slides to make the content less dense and easier to digest.

I really liked how the professor made the class environment feel welcoming and like a comfortable learning environment. This made it easier to engage with the material and helped me learn.

Lectures were particularly engaging and you could tell he cared about the class

Lot's of examples all over the slides. This made the content a lot more fun and easy to understand.

maybe the R scripts, for definitely, help go more in depth with the concepts.

no opinion

Nothing in particular, but the material itself provided perspective beyond the project.

Office hours

Probably one of the best lecturers I've ever had at UCSD. The lectures were extremely engaging, and he was always willing to work with students and answer questions at any time. The lectures were also funny at times and very interesting—such a kind professor.

Prof Dan helped me engage with the material most during lectures, he took the time to connect the topics to real world examples that brough energy to the classroom. I felt as though he was accessible to talk to through office hours outside of the scheduled lecture time. When I had a question that he knew would require a more in depth response he would suggest coming to office hours when I would approach him after class, I appreciated this extra effort to take the time when helping a student. Also, I really liked his versatility in how we could attend class, this way I was motivated to attend in any way that worked for me but still preferred to go in person to get the most out of it!

Prof Dan is amazing and he's so nice! Also helps break down complex concepts.

R studio files were good

Slides and being very engaging

Teacher was extremely welcoming, relatable, and was gracious when it came to teaching the class.

The professor allowed us to pitch in to examples used in the class which was fun and created an interactive learning enviroment.

The readings! The required and optional readings were helpful for me to get a grasp of the homework concepts.

the readings, hw and overall course structure was very helpful in learning.

Very quick responses and very straightforward class. I love it

Was very engaging with the class and used current situations to help articulate class topics.

Watching videos before lecture

yes, was very joyful and engaging in class.

15. Please describe any specific aspects of the course and/or teaching practices that your instructor used that were less helpful for your learning. Optionally you may offer constructive suggestions that might improve their effectiveness.

doing a lot of readings

Everything was perfect.

For the quizzes, is it possible to structure them so that the readings and the code are consistent? It really confused me that the quiz material incorporated code from the previous lecture, but the reading questions were for the upcoming lecture. Additionally, a lot of the technical readings were really difficult to understand. It seemed like during lecture, they were over viewed, but not strongly emphasized on, which makes me wonder if they are really critical to be mandatory readings.

Going to class

good

I believe his lectures and his style of teaching was very effective. I learned a lot from this course.

I like how Prof. Dan ran through the code for the class and explained what it meant. However, sometimes I feel like he went fast or skipped over certain sections, so I am just confused on what exactly I need to understand from his R scripts (despite the what you need to know at the bottom). I just feel like I wouldn't be able to execute the code if it wasn't for his code.

More practice problems.

no opinion

Nothing in particular.

Nothing was less helpful

Nothing, made sure the class was structured to ensure learning.

R-studio is just the worst

readings, there were too much and overwhelmed with the required ones

Since the class was 3 hours long, he allowed us to join through zoom and this really helped me stay engaged throughout the whole class.

Some of the description of the math was a little hard to understand. If you want to demonstrate the proofs, i suggest going a little more in depth or skipping over and just summarizing what the algorithm does in english.

The aspects that were less helpful in my learning were the amount of readings we were given for a week, I would have appreciated more of a condensed list. Also, with the amount of content we learn I would have wanted a list of concepts to study for the final instead of trying to study it all.

The R code was very advanced in my opinion for someone that barely had any info on what it is.

The readings were very confusing to me when they incorporated formulas and heavy math. It was almost discouraging. I found his in-person teachings on the formulas more useful, and when there are real life examples or when it is shown with an r-script.

There was not really something that was least helpful, but I would probably suggest to create like wealy journals were students can put what they learned for that week and also the questions that they have as a way to have notes for the students.

16. Please describe any specific aspects of the course and/or teaching practices that your instructor used that created or interfered with a welcoming learning environment that valued and supported students from all backgrounds and identities.

Always had a lot of energy and was passionate about what he was teaching.

Bought food for us and constantly engaged in small talk

Easy to talk to and approachable

Engaging course with a laid back vibe in the class.

good

Had a great personality, very easy to access especially through Piazza and had a lot of energy making the class very interactive and supportive.

Having both an in person session and a remote session for students who can't make it. Prof was really helpful and kept it a fun learned environment.

having group discussions

He made great effort to get to know students who chose to come to class and rewarded them with pizza.

I don't know

I love how Prof. Dan spends time engaging with his students at the beginning of lecture. He is very personable and shares aspects of his life, which I think is good for fostering connections with students. I also thought it was very kind and generous that he would treat his students to pizza and a fun brewery event. I've never had a professor do this before, so it just made me more inclined to go to class and less intimidated to speak to the him.

nna

no opinion

Nothing in particular, but I felt welcomed.

Prof Dan was able to create a welcoming environment that supported students through his appreciation to the class that he always vocalized and showed through the coordination of events or ordering us food! I always felt that he addressed examples in ways that did not deal with identity rather specific aspects of the course. I appreciate his willingness to help everyone and post job oppurutnities or connect us to professionals, expressing that everyone was welcome to apply or mention that he was our professor.

Profesor Dan always came with great energy, I really enjoy talking to him during our small breaks in lecture wich really help to feel a welcoming learning environment.

Super nice guy. Would take this class again!

The professor treated everyone like an adult and made an effort to get to know everyone. This made it feel very welcoming and encouraged me to want to come to class every week, especially since there were not typically a lot of people who attended every class. I also appreciate how it is recorded, since things do come up and we can't always make it. The absence of pressure to attend class made me want to come even more.

Tons of after-class activities, and the professor is very willing to engage with the students

We all became homies and ate pizza together so that was chill

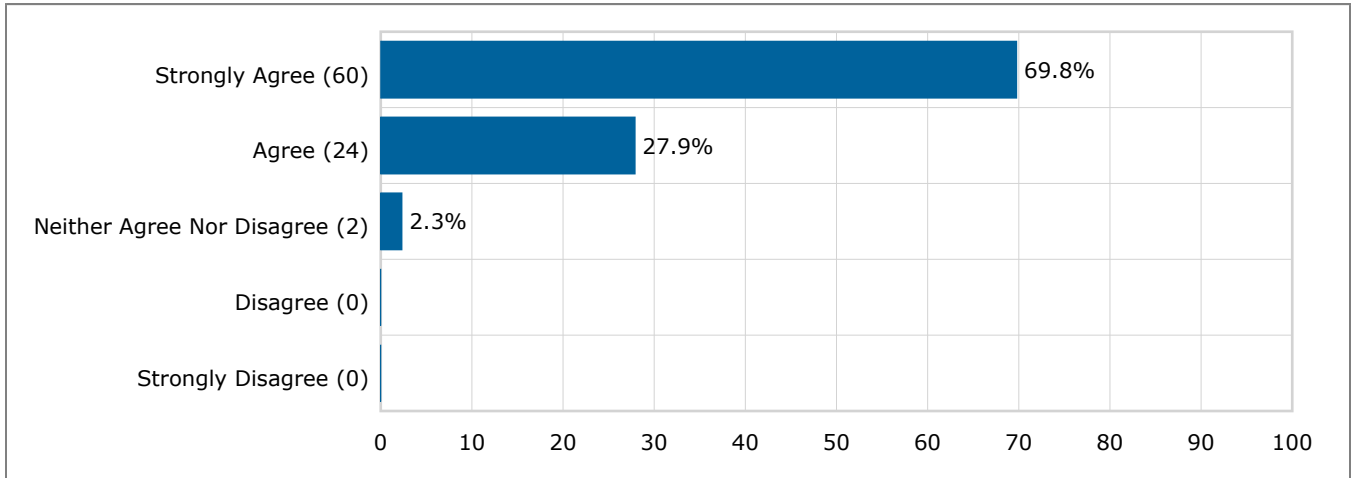

Yes, very welcoming, and made sure everyone felt welcome from the beginning of class.
AMAZING TEACHER!

yes.

Department Custom Questions

17. I would recommend this course to a fellow student in my program.

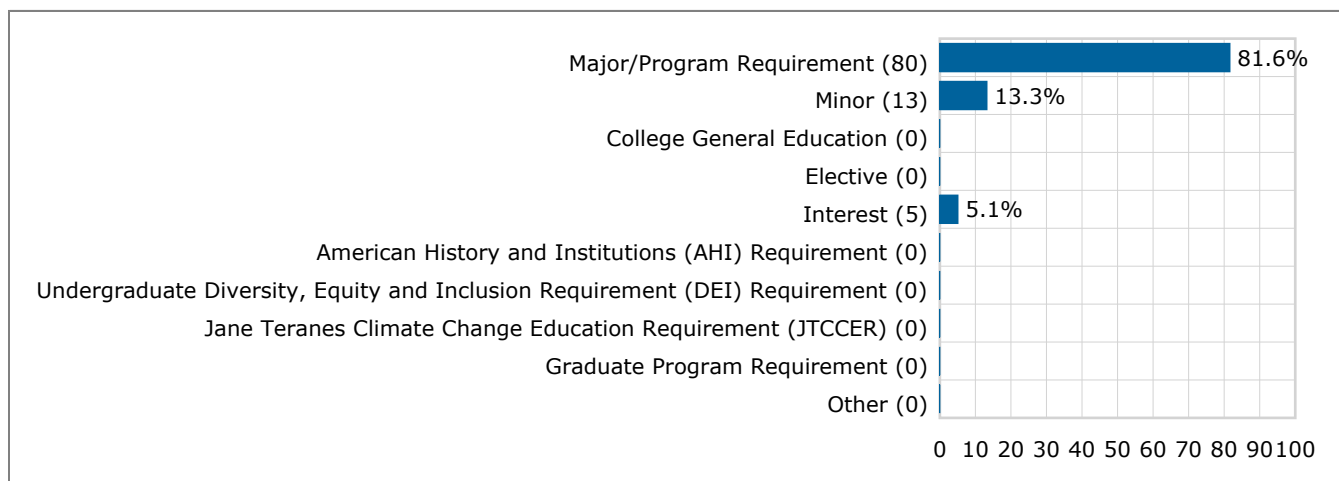

% Positive/Negative	Mean (SD)	Median	Response Count
97.7% Positive	4.67 ± 0.52 (Strongly Agree)	5 (Strongly Agree)	86 (95.56%)

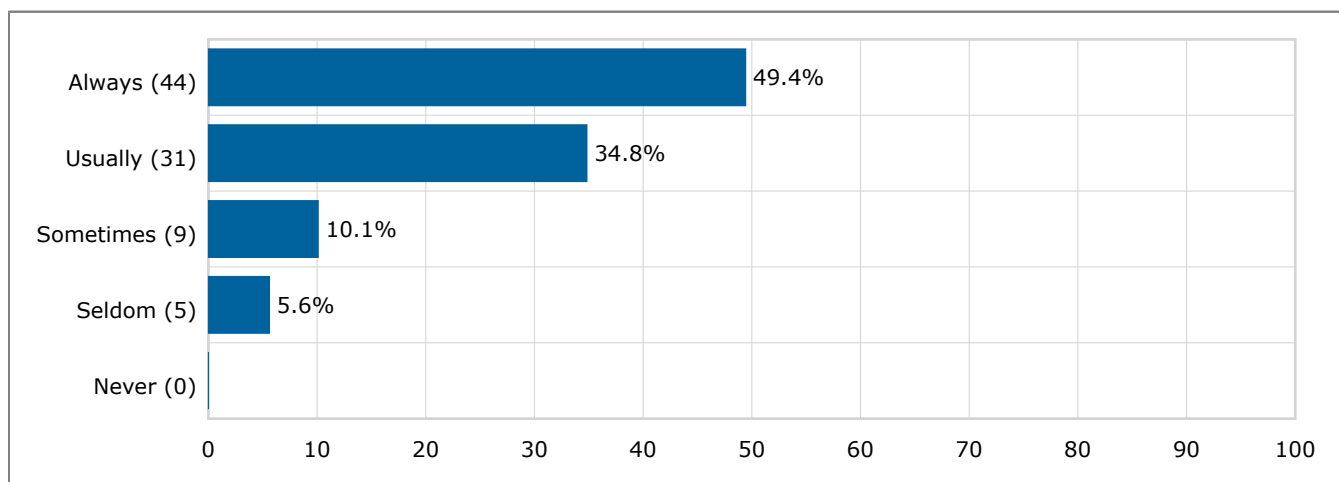

No Response: 4

Student Participation

18. What was/were your reason(s) for taking this course?

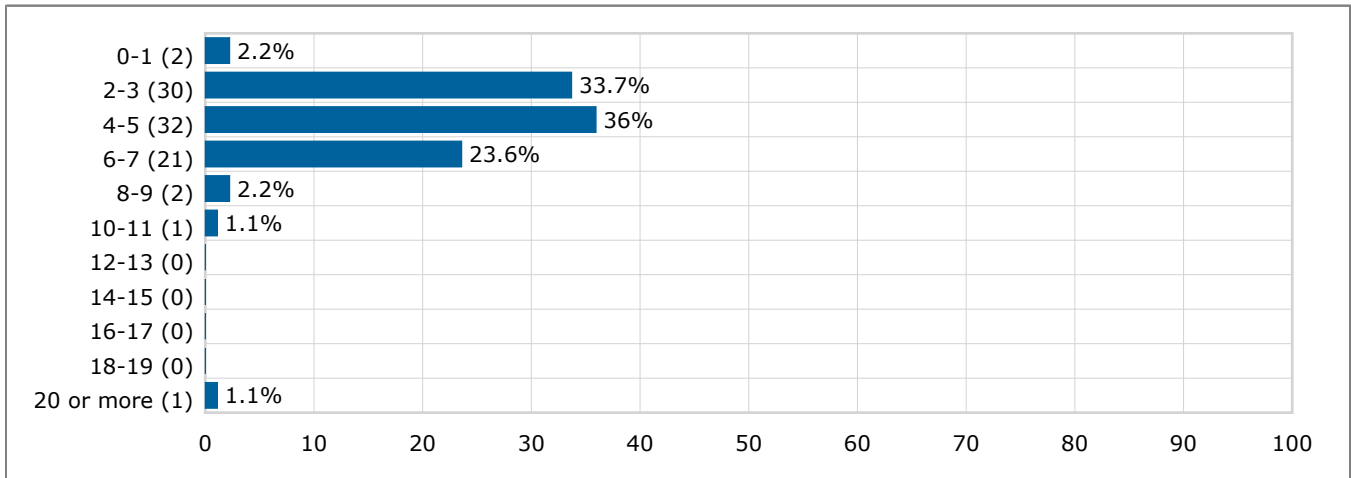

19. How often did you attend class and/or engage with course materials?

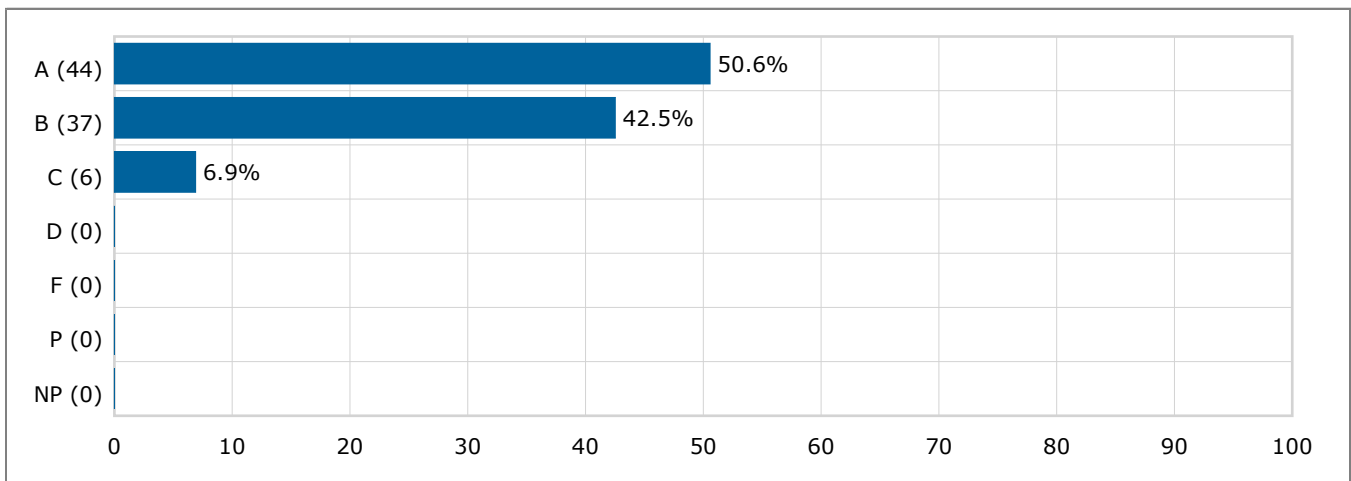

No Response: 1

20. Hours per week of work outside of class

No Response: 1

21. Expected grade in the course

No Response: 3

Additional Feedback

22. Is there anything else you would like to share about your experience in the course?

Amazing professor! If I had to recommend a professor for this class, I would recommend him.

fadgedgn

Great class, great professor. I can easily see where the priorities are and the professor is professional without losing his personal character. I think being able to bond with students in many ways is a great strong suit for him

I enjoyed the end of the year event!

I like how he do the class

I loved this class! I loved being the opportunity to learn how to build my own website, and I really appreciated how much the professor cared about his students. Even without the multiple free pizzas, you can tell how much he cares about teaching, which was awesome. I couldn't believe that he would drive around 5 hours every Friday just to teach this class. It was really cool how friendly and supportive he was of the students around him.

I really enjoy this course, it was fun to learn it. There was a lot of coding involve but Profesor Dan made it easy to understand.

I think this class was well constructed and Professor Dan is an amazing person and a great lecturer.

I would like practice exams for the final or a study guide.

it was one of my favorite classes and professors during my time at ucsd. he was very kind, helpful and welcoming. Class was very engaging and fun too.

no opinion

Nope, just an overall amazing teacher and person.

Nothing. I had a great time in this class. It's not an easy class, but It's not extremely difficult either.

Overall enjoyable instructor

Professor Dan was legit my favorite prof I've had at UCSD and I am very grateful to have taken this course with him!

Professor Yavorsky is dedicated and engaging, making difficult material seem approachable and made genuine effort to get to know and support us all.

Professor Yavorsky is the best! He truly cares about all of his students and puts the effort to get to know everyone. His commitment is very motivating as a student and he is very helpful, even with career related things. It is nice to have a professor that wants to help their students.

Very Great Class!!
