

Student Evaluation of Teaching (SET) for Dan Yavorsky

Summer Session II 2026 MGT 100 - Customer Analytics (Yavorsky, Daniel Ryan)
Section 263573 [A00]

Enrollment: 136

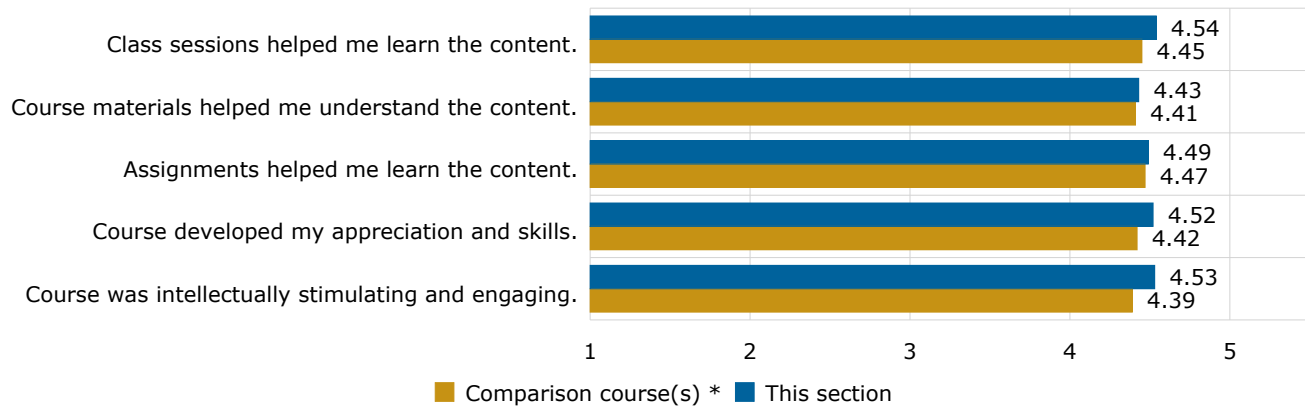

Responses: 93 (68.38% response rate)

SUMMARY RESULTS

* Comparison courses used: All Rady School of Management Summer Session II 2026 UD courses

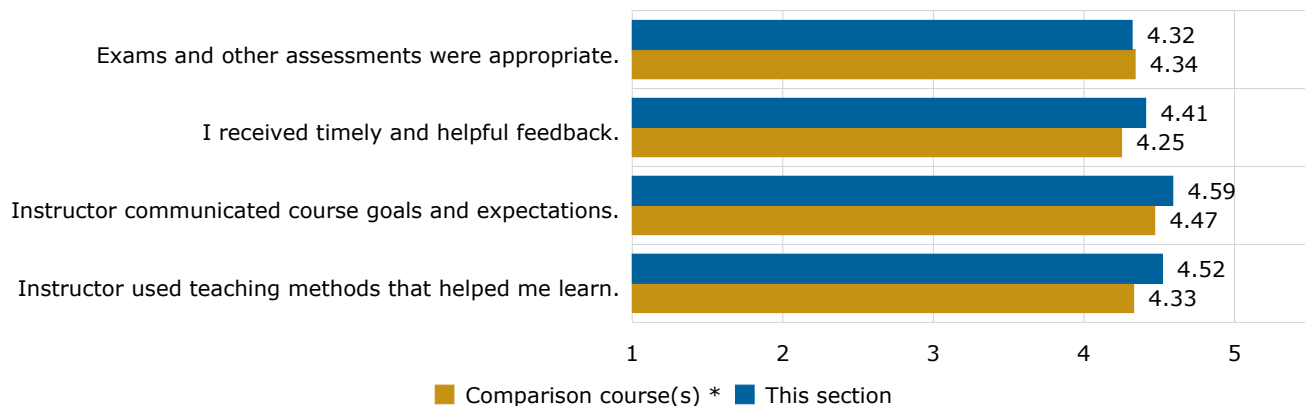

Student Learning

Class Mean: 4.5 (Strongly Agree) **Comparison Mean:** 4.43 (Agree)

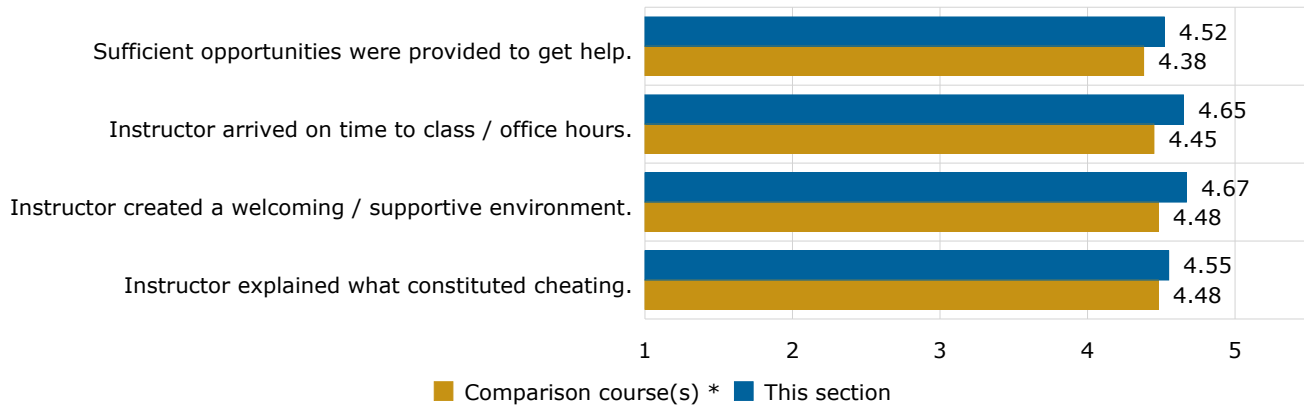

Course Structure

Class Mean: 4.46 (Agree) **Comparison Mean:** 4.35 (Agree)

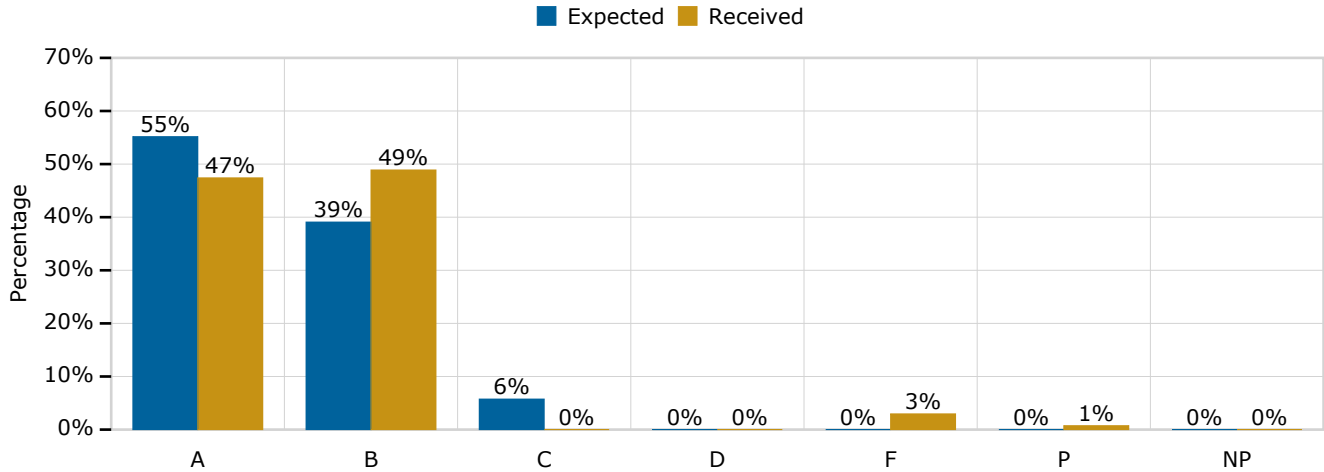

Class Environment

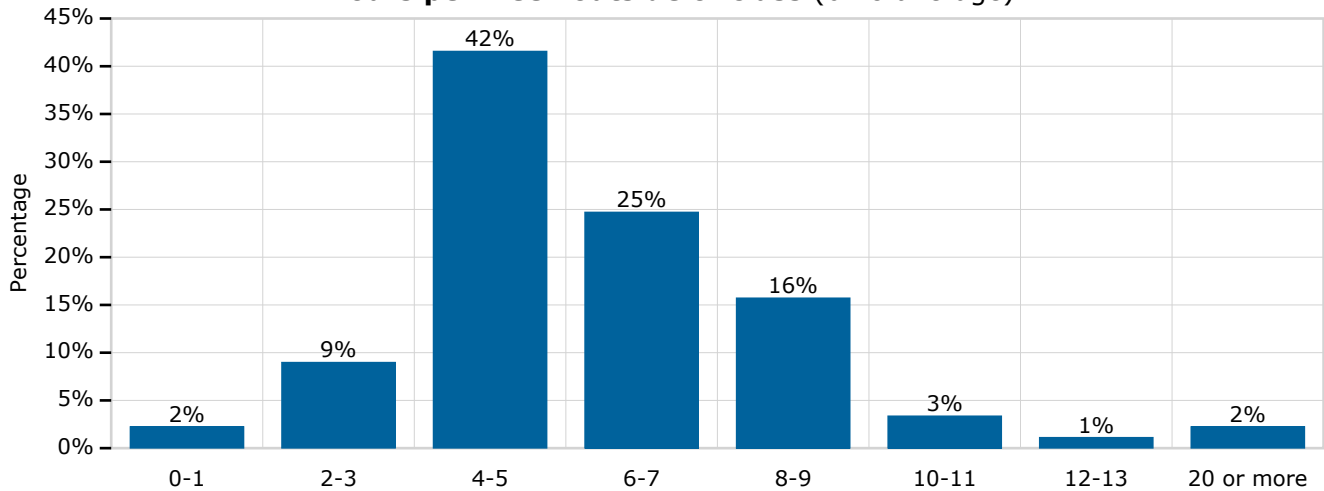

Class Mean: 4.6 (Strongly Agree) Comparison Mean: 4.45 (Agree)

Expected Grade (B+ average, 3.49, SET respondents) vs. Grade Received (B+ average, 3.39, all students)

Hours per week outside of class (6.48 average)

DETAILED RESULTS

Note: "% Positive" reflects responses of Strongly Agree or Agree; "% Negative" reflects Strongly Disagree or Disagree responses.

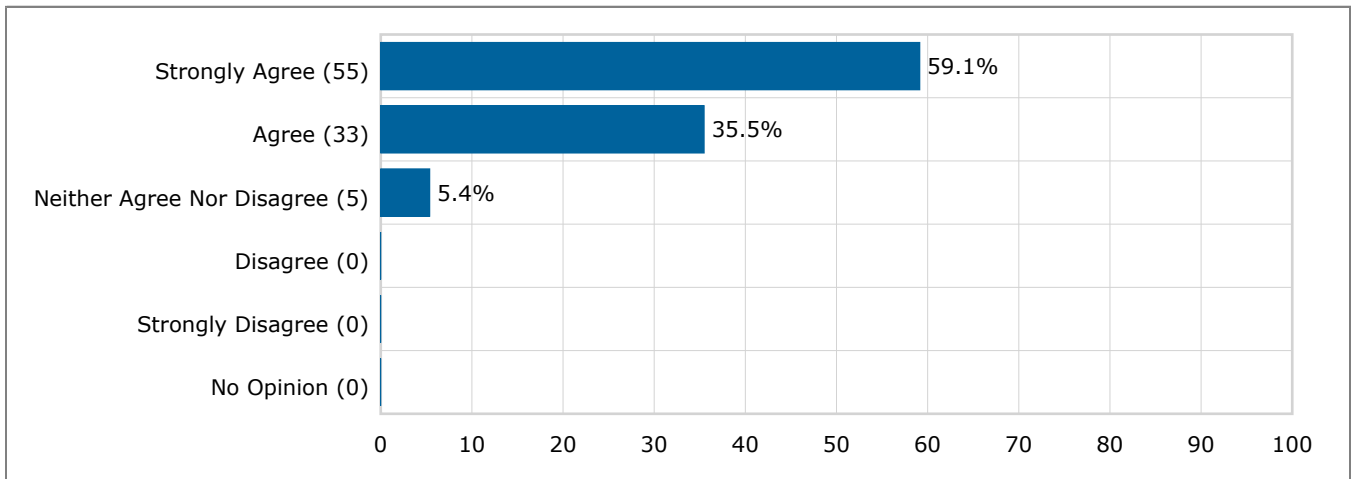

Scoring Methodology

A numerical value is assigned to each response in the standard Likert Scale used for evaluations: Strongly Agree (5), Agree (4), Neither Agree Nor Disagree (3), Disagree (2), Strongly Disagree (1). Responses marked "No Opinion/Not Applicable" are excluded from mean calculations.

Student Learning

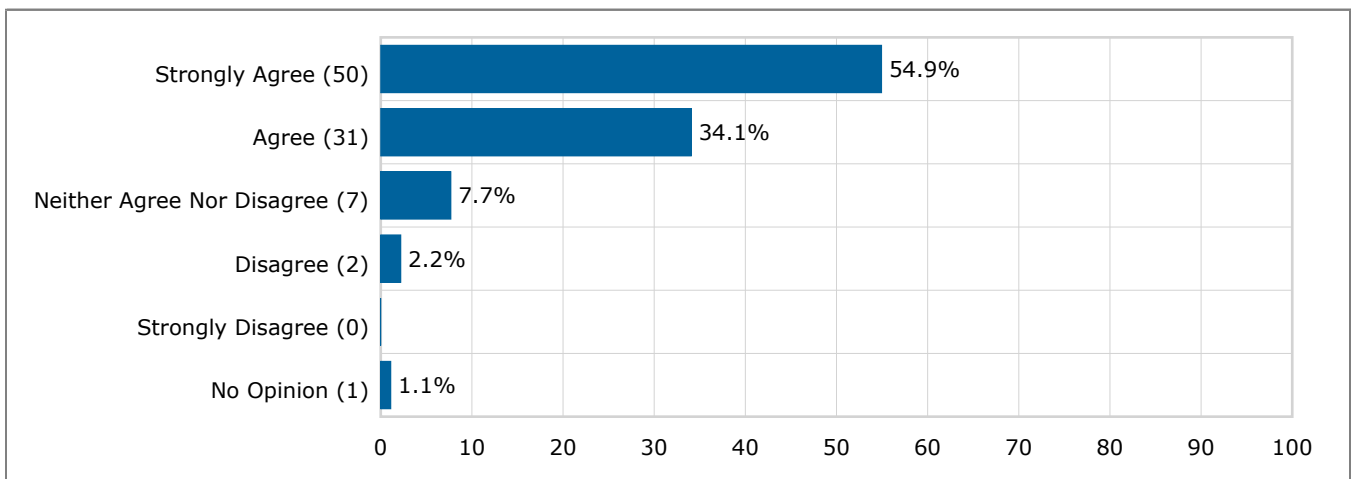

1. Class sessions helped me learn the course content.

% Positive/Negative	Mean (SD)	Median	Response Count
94.6% Positive	4.54 ± 0.60 (Strongly Agree)	5 (Strongly Agree)	93 (100.00%)

2. Course readings and other course materials helped me learn course content.

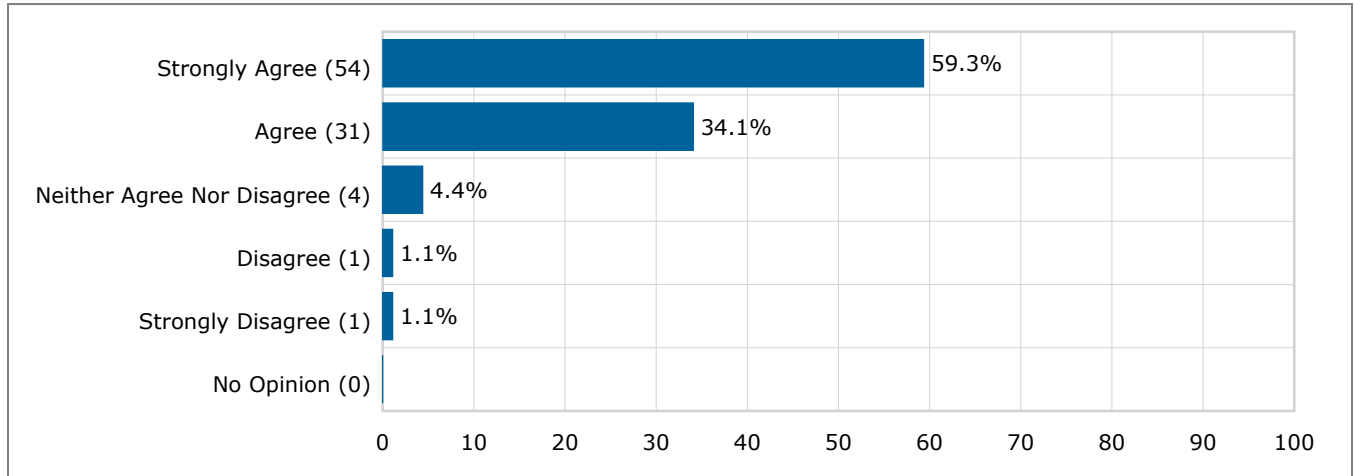

% Positive/Negative	Mean (SD)	Median	Response Count
89% Positive 2.2% Negative	4.43 ± 0.73 (Agree)	5 (Strongly Agree)	91 (97.85%)

No Response: 2

3. Assignments (homework, projects, etc) helped me learn the course content.

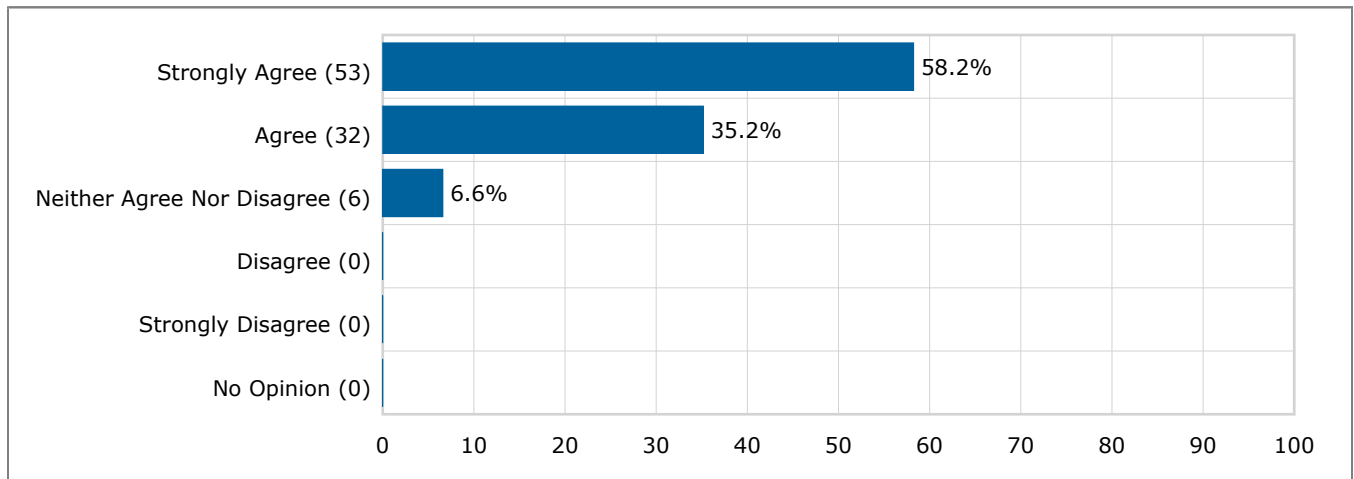

% Positive/Negative	Mean (SD)	Median	Response Count
93.4% Positive 2.2% Negative	4.49 ± 0.73 (Agree)	5 (Strongly Agree)	91 (97.85%)

No Response: 2

4. The course developed my appreciation of and skills for the subject.

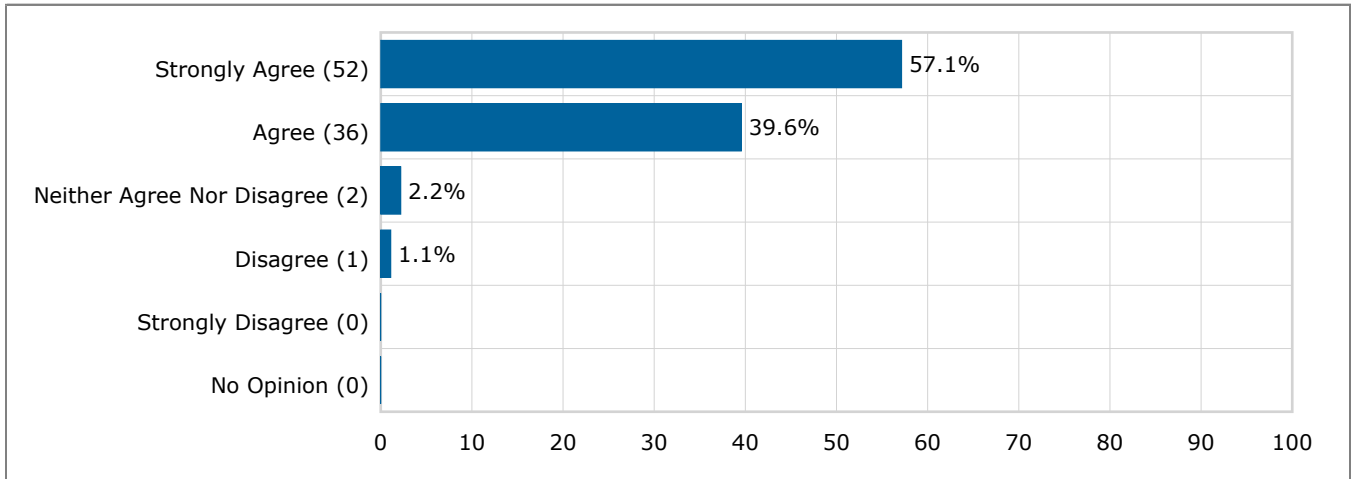

% Positive/Negative	Mean (SD)	Median	Response Count
93.4% Positive	4.52 ± 0.62 (Strongly Agree)	5 (Strongly Agree)	91 (97.85%)

No Response: 2

5. The course was **intellectually stimulating and engaging**.

% Positive/Negative	Mean (SD)	Median	Response Count
96.7% Positive 1.1% Negative	4.53 ± 0.60 (Strongly Agree)	5 (Strongly Agree)	91 (97.85%)

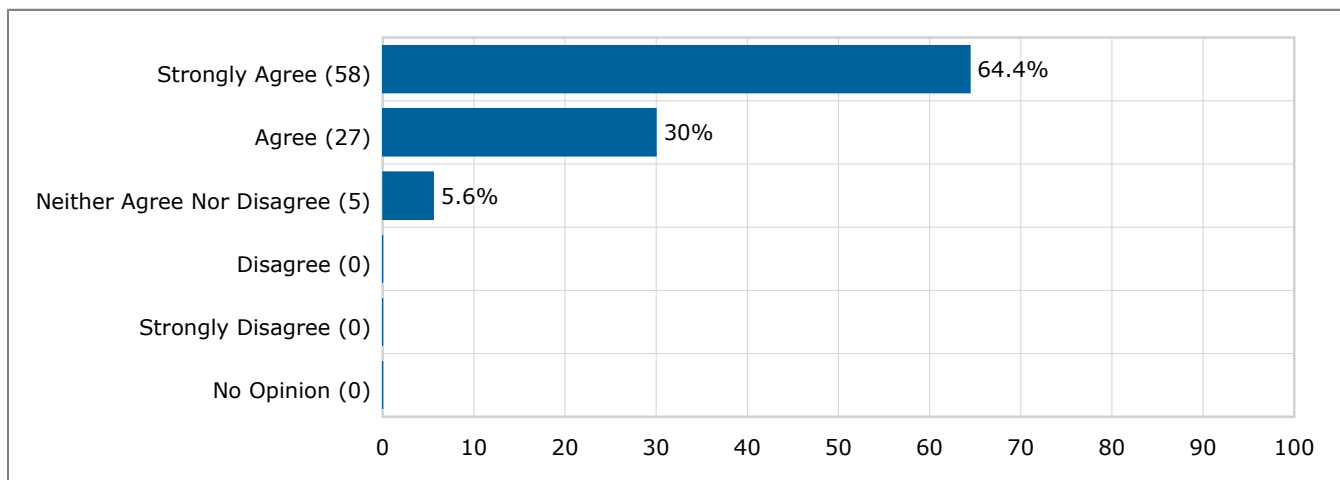

No Response: 2

Course Structure

6. The instructor effectively communicated **course goals**, learning **outcomes**, and **expectations**.

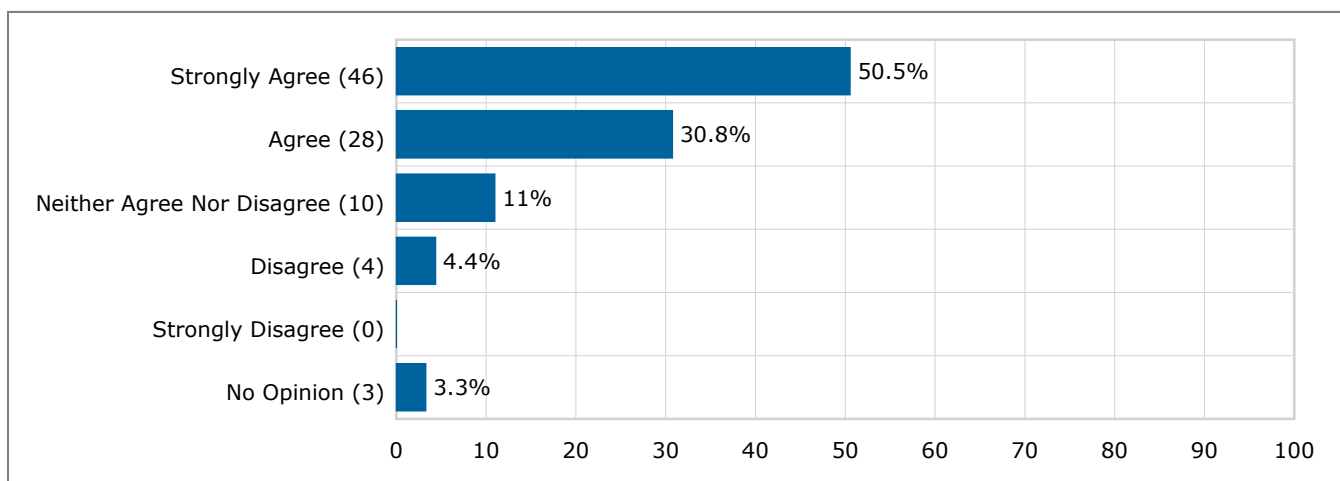

% Positive/Negative	Mean (SD)	Median	Response Count
94.4% Positive	4.59 ± 0.59 (Strongly Agree)	5 (Strongly Agree)	90 (96.77%)

No Response: 3

7. **Exams and other assessments** (essays, projects, etc) were an appropriate measure of course learning outcomes.

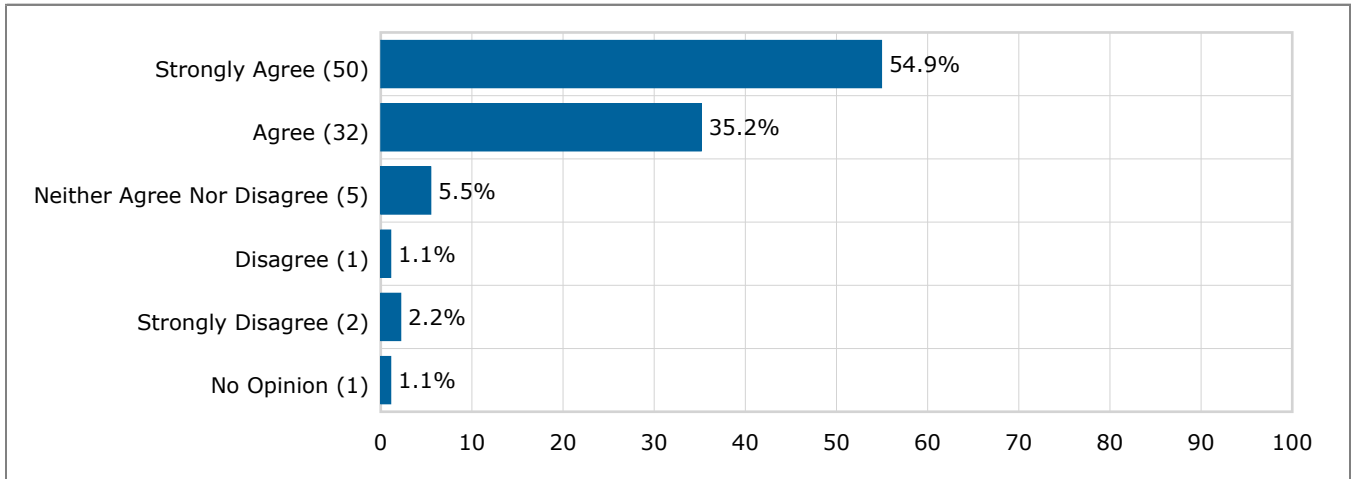

% Positive/Negative	Mean (SD)	Median	Response Count
81.3% Positive 4.4% Negative	4.32 ± 0.85 (Agree)	5 (Strongly Agree)	91 (97.85%)

No Response: 2

8. I received **timely and helpful feedback** in this course.

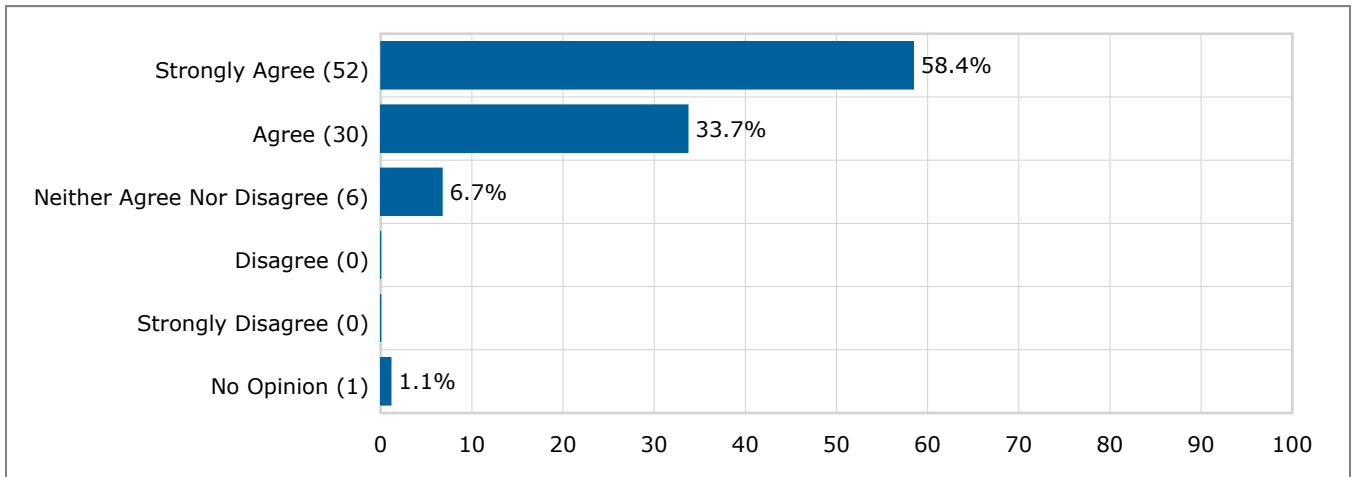

% Positive/Negative	Mean (SD)	Median	Response Count
90.1% Positive 3.3% Negative	4.41 ± 0.83 (Agree)	5 (Strongly Agree)	91 (97.85%)

No Response: 2

9. The instructor incorporated **teaching methods** that helped me learn.

% Positive/Negative	Mean (SD)	Median	Response Count
92.1% Positive	4.52 ± 0.62 (Strongly Agree)	5 (Strongly Agree)	89 (95.70%)

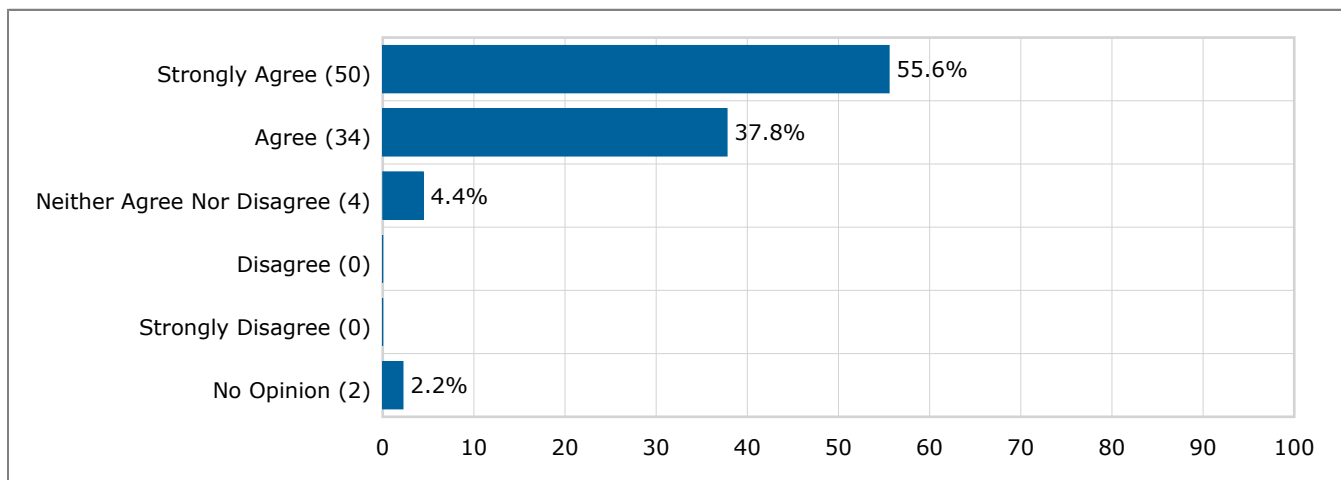

No Response: 4

Class Environment

10. There were sufficient **opportunities offered for me to get help** when needed (e.g. established office hours, discussion section, discussion board, etc).

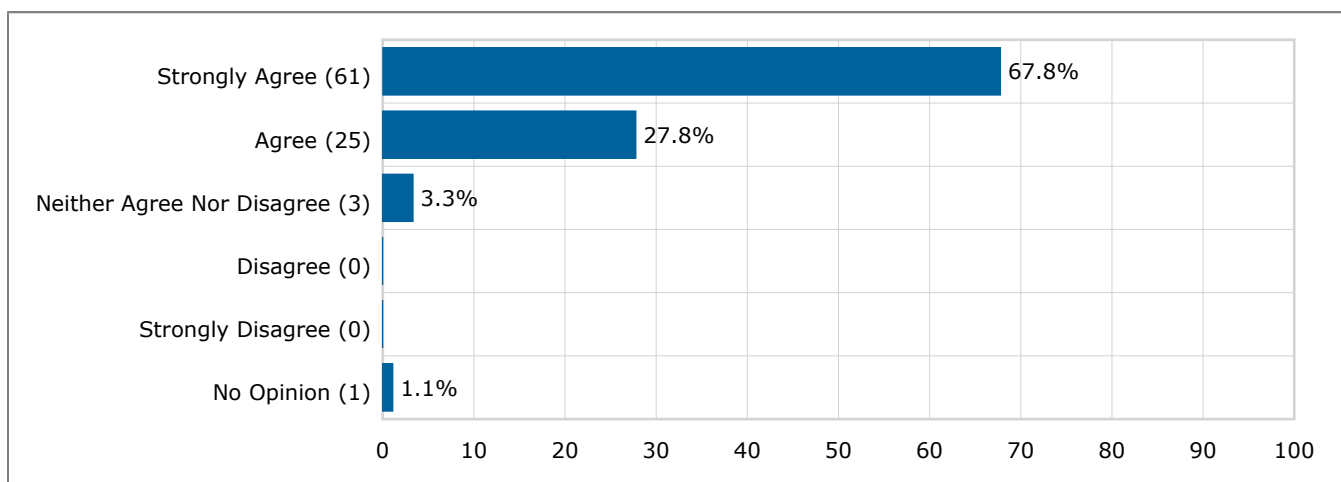

% Positive/Negative	Mean (SD)	Median	Response Count
93.3% Positive	4.52 ± 0.58 (Strongly Agree)	5 (Strongly Agree)	90 (96.77%)

No Response: 3

11. The instructor **arrived on time** to class sessions and office hours.

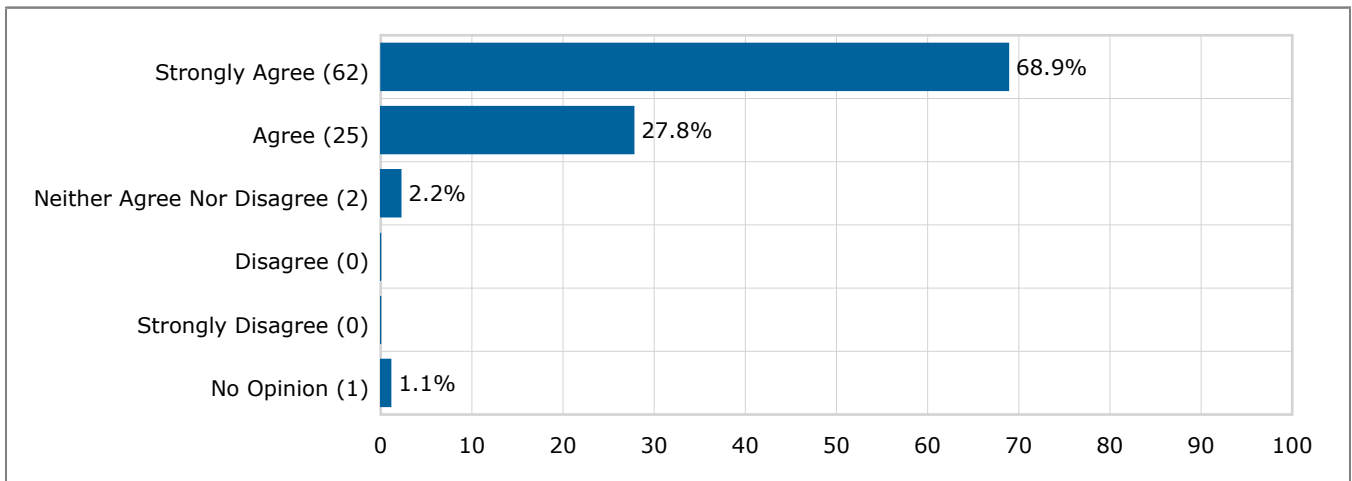

% Positive/Negative	Mean (SD)	Median	Response Count
95.6% Positive	4.65 ± 0.54 (Strongly Agree)	5 (Strongly Agree)	90 (96.77%)

No Response: 3

12. The instructor created a **welcoming and supportive learning environment** that valued and supported students from all backgrounds and identities.

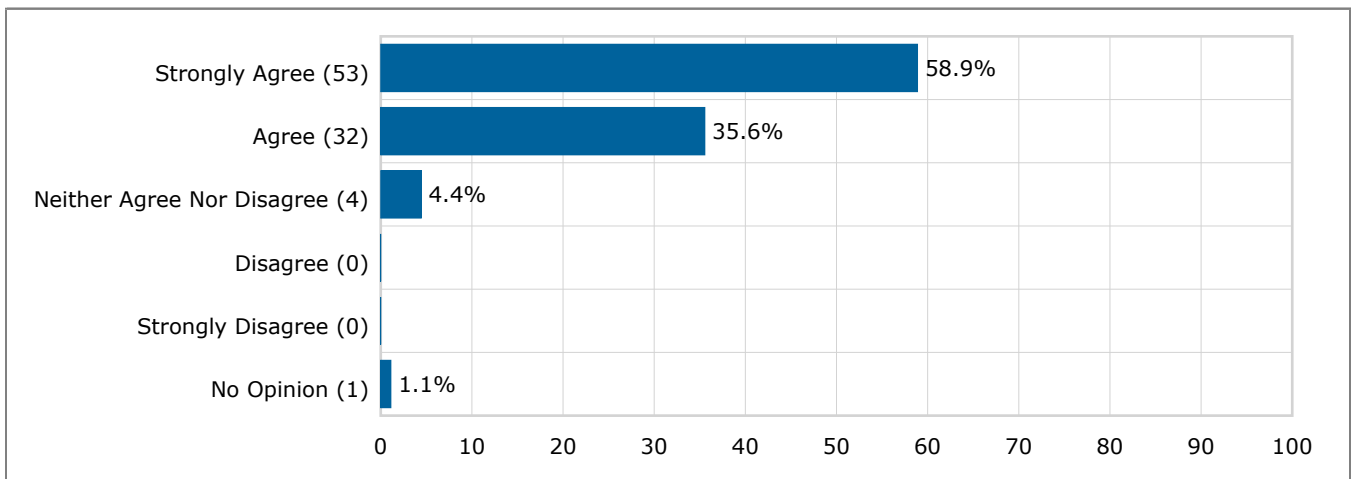

% Positive/Negative	Mean (SD)	Median	Response Count
96.7% Positive	4.67 ± 0.51 (Strongly Agree)	5 (Strongly Agree)	90 (96.77%)

No Response: 3

13. The instructor explained what constituted cheating in this course and emphasized the importance of **academic integrity**.

% Positive/Negative	Mean (SD)	Median	Response Count
94.4% Positive	4.55 ± 0.58 (Strongly Agree)	5 (Strongly Agree)	90 (96.77%)

No Response: 3

Please describe any specific aspects of the course and/or teaching practices that your instructor used that...

14. Please describe any specific aspects of the course and/or teaching practices that your instructor used that particularly helped you to engage with the material, learn the material, and/or develop your own critical perspectives on the material.

Clear lectures, clear information, breaking everything down from beginner level to more difficult, made difficult material manageable and understandable

cool

Detailed lecture slides and step-by-step R scripts were very helpful.

He explained the purpose of the code well and how it related to the course

I liked how the lectures were recorded 4 hours is a lot for a course and to be honest it is a lot to congest in one whole setting I love how he separates the marketing aspect with the R aspect

I really like the way prof Dan teach this class, it helps us engage more

I think it was the slides and the breakdown of the R Code for the week which helped me really understand the material and goal of the assignments

I think the professor's way of teaching was super helpful. He really tried to keep the class engaged and I appreciated his sense of humor. I wish I had taken this in person with him as an instructor.

Kept material very real-world focused. Very interactive highlighted the importance of data and the utility of data manipulation.

lecture slides

Lectures were engaging

no opinion

Prof Dan seems really cool and was very engaging, especially for the class being online. I wish it had worked out that I got to take the class in person.

provide ppt

R studio time in class

The class discussions and assignments were particularly helpful because they gave me opportunities to apply the concepts instead of only learning definitions. I especially liked assignments where we had to analyze real examples and make our own decisions about what the results meant. This helped me understand the material more deeply and develop my own perspective rather than just trying to find one correct answer.

The class structure and lecture was very informative and helped me understand all of the topics that we learned in class theoretically.

The connections just to different companies and real world examples provided in class

The homework assignments really helped.

The homeworks

the lectures

The lectures were very engaging

the overall class structure helped me be more stimulated and engaged with the course a majority of the assignments were interesting and made me want to do them

The pictures through the lecture slides.

The professor was very patient and went through the example step by step. This made the material more engaging.

the r studio towards the end of class

the zoom sessions were engaging and fun.

Very interesting lectures. I loved the humor

Welcoming emery, additional videos helped with working in R

What really allowed me to learn the material that was taught in class was the homework. Overall the class had a lot of valuable information but applying it in the homework furthered my understanding.

x

yes

15. Please describe any specific aspects of the course and/or teaching practices that your instructor used that were less helpful for your learning. Optionally you may offer constructive suggestions that might improve their effectiveness.

all good

confused the whole time of the assignment rubrics

cool

Have a more precise rubric on what a full 10/10 looked like. While this is minimal concern since it allowed me to really show what I can do, when I got an 8 I would wonder what went missing (up until an example was posted)

homework assignments were often vague

Homework lacked a little bit of structure.

I found everything the professor did to be extremely helpful for my learning.

I think giving grades purely based on ranking the class so a certain percentage of students gets A, and B ect is very unhelpful and a bad way to support student learning.

I think the grading of the assignments was rather harsh and discouraging

I would say open ending homework assignment could be sometimes confusing and brings anxiety to me because i really dont know what to do to get full points

It kind of sucked that you essentially had to compete to get an A; it wasn't doing it to the best of your ability it was doing it better than everyone else, which was really discouraging if you didn't have much R / R-studio / claude experience, and it wasn't always super clear how he wanted you to extend things.

It was frustrating that the homeworks were stack ranked, and we weren't given examples of what homework expectations looked like until after the assignment was due. Especially given that the homework was worth a significant percentage of our grade.

As written, a submission can be correct, complete, demonstrate independent thought, and fully satisfy the stated requirements, yet still receive an 8/10. A 10/10 appears to require a student to independently identify an additional assumption, perform an analysis that was not requested, or discover something surprising beyond the scope of the prompt.

My concern is that this makes the distinction between an 8 and a 10 difficult to anticipate. If certain forms of additional analysis are necessary for full credit, I think those expectations should be incorporated into the assignment instructions or rubric in a way that students can reasonably work toward. Otherwise, students may complete everything they were explicitly asked to do at a very high level and still lose 20% because they did not anticipate an unstated extension.

Just seems like a bad class to take over summer. Jamming it into 5 weeks made me feel unable to give it the time it deserved since I am taking 2 other summer classes, maybe a different experience for other students. I wish I was more able to explore the coding aspect, or came out with a better understanding of how to practice/improve in R Studio. The Homework grading felt confusing, I got a lower score on an assignment that I tried using less AI to complete.

Lecture formats didn't really feel engaging and especially by the portion of class that become the R coding, it was even less engaging to follow because we weren't really doing much on our end.

Maybe more engagement with the class for an online summer session. The breaks help but I would prefer engagement to kept focus intact.

Need more dog cams, depressed when no dog cam

no examples for homework assignments or any feedback for points missing. not clear on how grades are calculated throughout the course and no way of knowing if you are doing well or not.

no opinion

Nothing He did a good job my only problem was the duration of the course

Nothing really comes to mind, everything in the lecture and class felt quite good. This is just for me since I am bad at coding just a little more breakdown or resources to help further R/coding understanding

Readings about R just hard to follow and super long which makes sense

Some of the more technical material was less helpful when it moved quickly from the concept to the application. I sometimes understood what we were doing but needed more time to understand why a certain method or approach was appropriate. It would be helpful to have a few more simple examples before moving to more complicated applications, especially for topics involving data analysis.

The engagement points

the homework assignments. I do not understand how using AI on the assignments grants you a better grade compared to someone who did not use AI but is not visually better.

The readings where less effective but everything else was enough

very helpful

x

16. Please describe any specific aspects of the course and/or teaching practices that your instructor used that created or interfered with a welcoming learning environment that valued and supported students from all backgrounds and identities.

cool

Created a welcoming learning environment- he always asked questions and made me think

have ppt

I felt that the course created a welcoming learning environment. Different opinions and interpretations were encouraged, and I felt comfortable approaching the assignments from my own perspective. I also appreciated that students could use different tools and approaches to work through the material. Overall, I felt that the class supported students with different backgrounds and ways of learning.

no opinion

Nothing at all

Professor always paused to answer or ask if students had any questions.

professor showing us his do which was very cute

the classes were very engaging and

The overall class environment

The prof is very nice and kind and warm, seems genuinely invested in teaching (way better than the other guy who runs this course, that guy was mean)

The professor created a great learning environment and was super supportive and resourceful when needing questions answered!

Used real examples and wanted to engage with students

Valued students input. allowed for criticism on slides. Very open to improvement and feedback while remaining a very digitally competent, caring professor.

very open to different opinions on zoom

x

yes

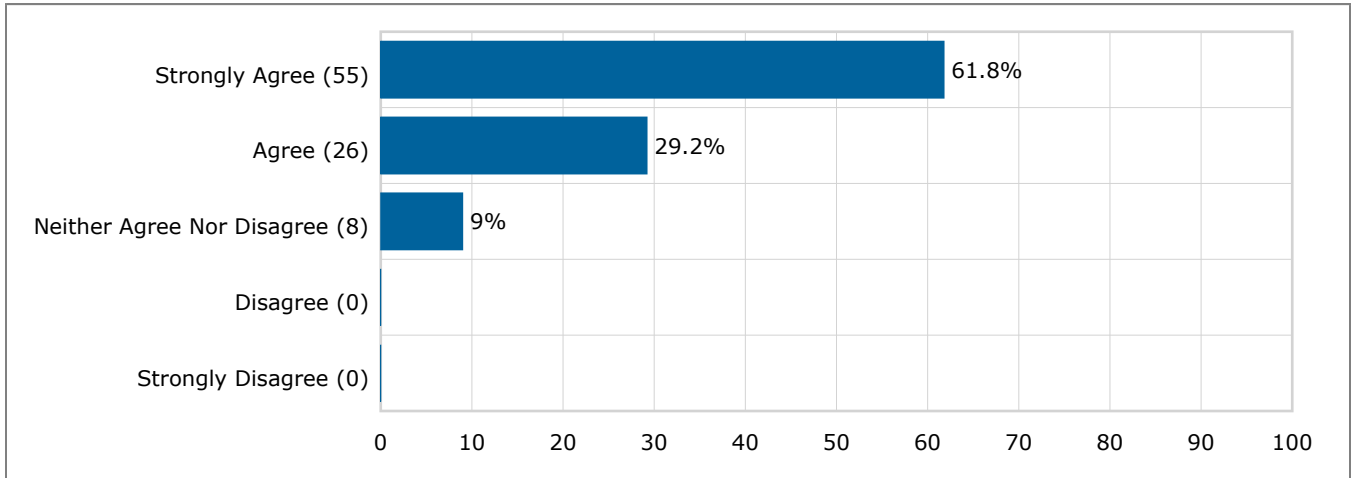

Yes, professor was very professional and welcomed everyone to his classroom

zoom meetings

Department Custom Questions

17. I would recommend this course to a fellow student in my program.

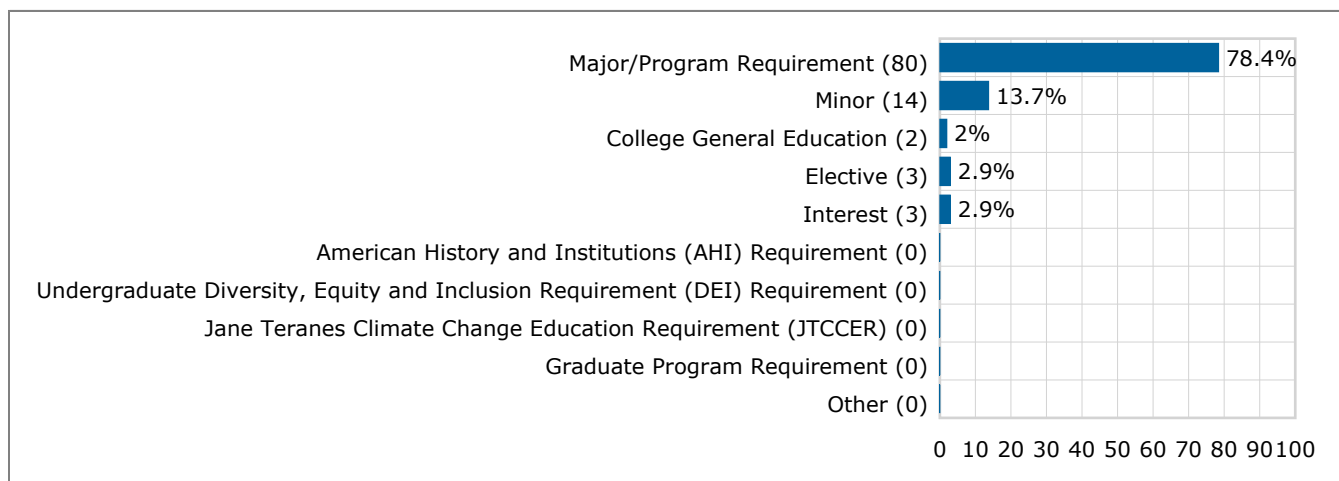

% Positive/Negative	Mean (SD)	Median	Response Count
91% Positive	4.53 ± 0.65 (Strongly Agree)	5 (Strongly Agree)	89 (95.70%)

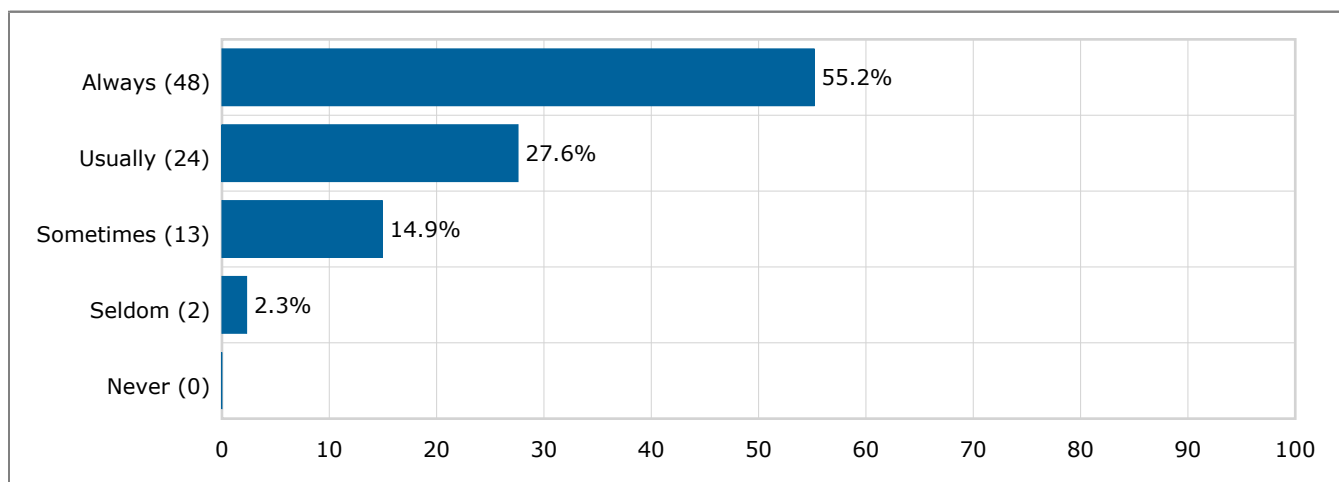

No Response: 4

Student Participation

18. What was/were your reason(s) for taking this course?

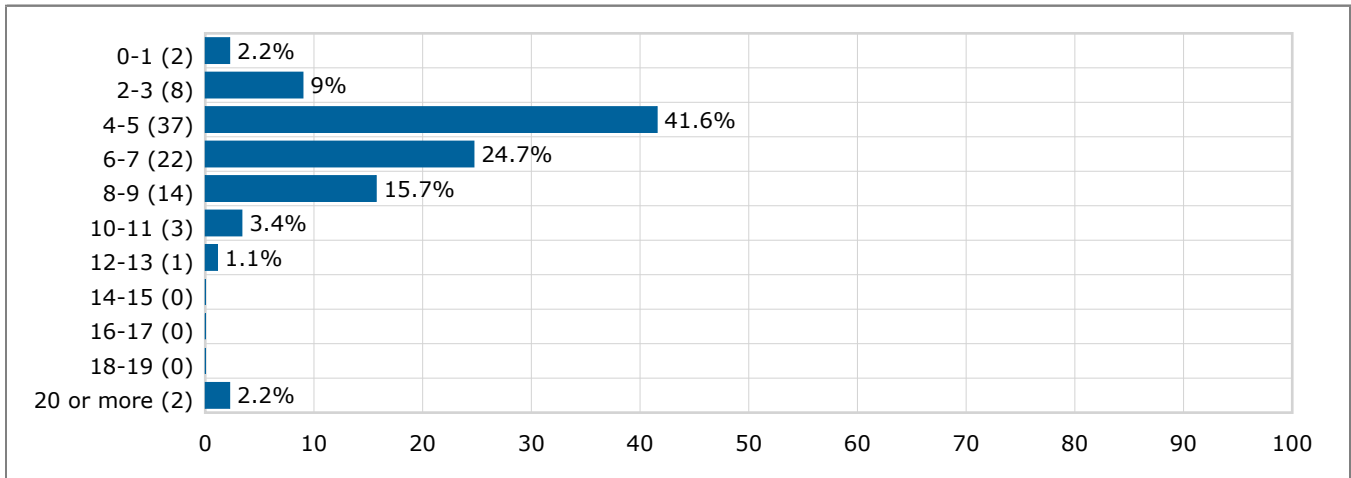

19. How often did you attend class and/or engage with course materials?

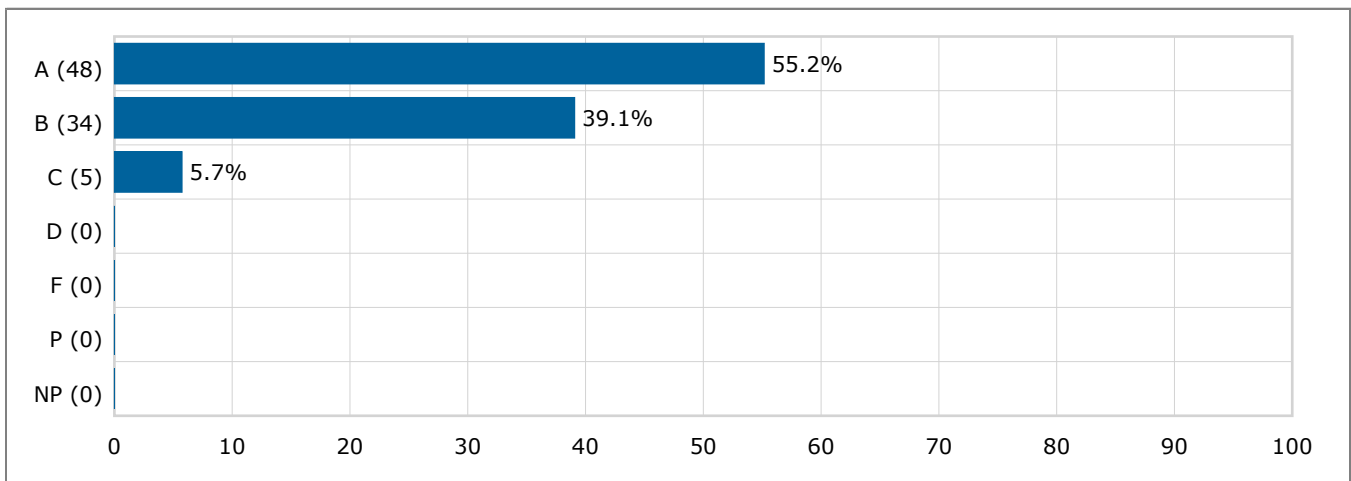

No Response: 6

20. Hours per week of work outside of class

No Response: 4

21. Expected grade in the course

No Response: 6

Additional Feedback

22. Is there anything else you would like to share about your experience in the course?

great class and great prof overall

Great experience taking this in summer session II! Professor was amazing and the content was interesting and fun to learn/work on!

He is great!

I like the professor's approach to teaching and how kind he was. It felt like a breath of fresh air.

I love how tough the homeworks are. Don't change it. Don't make it too easy. Legit the only MGT class that ever taught me anything useful.

I very much enjoyed it. It was a good last class for me to have at UCSD before I completely graduate

I want to thank the Professor for his hard work teaching us in class and assisting us if needed. He always asks us how we are doing, is very thoughtful and tries to keep the energy going throughout the class. Overall, he did amazing and is a really good teacher.

Maybe ease the assignments especially the first couple as some students may not be familiar with R and may find it really difficult the first couple of weeks. Other than that Professor Yavidsky has been great, awesome, and bubbly. Great personality and welcoming energy. Replies super quickly to emails and to Piazza .Highly timy responses and highly recommend this professor!

Prof Dan, again, seems really awesome. I wish I had more time on this material. Probably a much better full quarter class so that you can take your time on the assignments and dive into the code and readings more. The only thing I disliked at all about the class was the homework grading scale. Only having 5s 8s and 10s seems strange to me.

Professor Dan is great. As a business economics major, I was not expecting coding to be of any importance to skillset I would use in the future but Professor Dan and his course has changed my perspective on that. He is truly a gem of a professor and I really appreciate the time and dedication he takes into getting what he calls a real teaching experience for his students.

Professor Yavorsky was a great, passionate and creative teacher who was very helpful and great to talk to in class!

The remote course was very understandable and was not a barrier in my learning, I was extremely glad to be able to take this course online with Professor Yavorsky because he made the material understandable and less intimidating for someone who has never used R Studio or R Code before.

x

| You're super amazing . I liked your extra points policy
